Subject: Request to cite and reference your work

Dear Dr. York and Dr. Ertmer,

My name is Kristin Machac, and I am a PhD candidate at Virginia Tech. I have just completed a dissertation titled: A model of expert instructional design heuristics incorporating design thinking methods. Two of my research questions were largely inspired by your research studies of expert instructional designers in practice and the challenges faced by novice designers. In your Delphi study examining instructional design principles applied by experienced designers in practice, you posed the questions: (a) Can we teach principles to novice instructional designers, and (b) What methods should we use to provide this information? The development of my proposed model sought to offer generalized heuristics of expert instructional designers aligned with design thinking methods and combinations of methods. I write to request your permission to cite and reference your table of 61 principles defined in your 2011 and 2016 articles. I have attached a copy of my dissertation for your reference.

I cannot begin to express how inspired I have been by your work throughout my studies. Please let me know if you have any questions regarding this request for reference.

My best,
Kristin Machac, MEd, PhD Candidate
