

## List of Figures

Figure 1. OM Solar roof system.....	2
Figure 2. Solar Roof Collector System and a house section.....	2
Figure 3. The Silberstein house model in Sacramento, California.....	3
Figure 4. Section of a typical solar roof collector system.....	10
Figure 5. Front, south view of the solar roof collector .....	11
Figure 6. Interior side of the collector (heated air is collected in the ductwork).....	12
Figure 7. Relationship between the incident angle and the absorptance for an opaque surface.....	15
Figure 8. Solar Roof Collector model with glazing (Collector Two).....	17
Figure 9. Section of Collector One .....	17
Figure 10. View of the Solar Roof Collector model.....	17
Figure 11. Southeast corner view of the solar roof collector.....	18
Figure 12. Interior side of the solar roof collector mock-up.....	19
Figure 13. Solar Roof Collector section with thermal couple locations.....	20
Figure 14. Section of the collector with labels in length.....	25
Figure 15-a. Typical Ranch style house.....	28
Figure 15-b. Typical Ranch style house.....	29
Figure 16-a. Typical two-story house.....	29
Figure 16-b. Typical two-story house.....	29
Figure 16-c. Typical two-story house.....	30
Figure 17. Section of the roof structure in balance point temperature calculation.....	31
Figure 18. Section of the wall structure in balance point temperature calculation.....	32
Figure 19. Area calculation method illustration of the ranch house.....	34
Figure 20. Section - area calculation method illustration of the ranch house.....	35
Figure 21. The space heating energy collected from the three collectors.....	54
Figure 22. Space heating energy saving from Collector One on the Ranch house.....	55
Figure 23. Space heating energy saving from Collector Two on the Ranch house.....	55
Figure 24. Space heating energy saving from Collector Three on the Ranch house.....	55
Figure 25. Space heating energy saving from Collector One on the two-story house.....	56
Figure 26. Space heating energy saving from Collector Two on the two-story house.....	56
Figure 27. Space heating energy saving from Collector Three on the two-story house.....	56
Figure 28. The hot water preheating energy collected from the three collectors.....	57

### Appendix I The Linearity Test of the Incremental Temperature Differences for Each Collector

Figure I-1 Regression results for test of linearity for incremental temperature differences for Collector One in the temperature range 30°F to 50°F.....	67
Figure I-2 Regression results for test of linearity for incremental temperature differences for Collector One in the temperature range 50°F to 70°F.....	68
Figure I-3 Regression results for test of linearity for incremental temperature differences for Collector One in the temperature range 70°F to 90°F.....	69
Figure I-4 Regression results for test of linearity for incremental temperature differences for Collector Two in the temperature range 30°F to 50°F.....	70

Figure I-5 Regression results for test of linearity for incremental temperature differences for Collector Two in the temperature range 50°F to 70°F.....	71
Figure I-6 Regression results for test of linearity for incremental temperature differences for Collector Two in the temperature range 70°F to 90°F.....	72
Figure I-7 Regression results for test of linearity for incremental temperature differences for Collector Three in the temperature range 30°F to 50°F.....	73
Figure I-8 Regression results for test of linearity for incremental temperature differences for Collector Three in the temperature range 50°F to 70°F.....	74
Figure I-9 Regression results for test of linearity for incremental temperature differences for Collector Three in the temperature range 70°F to 90°F.....	75

## **Appendix II X-Y Plots of the Independent Variables**

Figure II-1 Incident angle versus Tdiff for C1 in the temperature range from 50°F to 70°F, June28, 2003-July 4, 2003.....	76
Figure II-2 Incident angle versus Tdiff for C1 in the temperature range from 70°F to 90°F June28, 2003-July 4, 2003.....	76
Figure II-3 Incident angle versus Tdiff for C2 in the temperature range from 50°F to 70°F June28, 2003-July 4, 2003.....	77
Figure II-4 Incident angle versus Tdiff for C2 in the temperature range from 70°F to 90°F June28, 2003-July 4, 2003.....	77
Figure II-5 Incident angle versus Tdiff for C3 in the temperature range from 50°F to 70°F June28, 2003-July 4, 2003.....	78
Figure II-6 Incident angle versus Tdiff for C3 in the temperature range from 70°F to 90°F June28, 2003-July 4, 2003.....	78
Figure II-7 Incident angle versus Tdiff for C1 in the temperature range from 30°F to 50°F Nov 19, 2003-Nov.25, 2003.....	79
Figure II-8 Incident angle versus Tdiff for C1 in the temperature range from 50°F to 70°F Nov 19, 2003-Nov.25, 2003.....	79
Figure II-9 Incident angle versus Tdiff for C1 in the temperature range from 70°F to 90°F Nov 19, 2003-Nov.25, 2003.....	80
Figure II-10 Incident angle versus Tdiff for C2 in the temperature range from 30°F to 50°F Nov 19, 2003-Nov.25, 2003.....	80
Figure II-11 Incident angle versus Tdiff for C2 in the temperature range from 50°F to 70°F Nov 19, 2003-Nov.25, 2003.....	81
Figure II-12 Incident angle versus Tdiff for C2 in the temperature range from 70°F to 90°F Nov 19, 2003-Nov.25, 2003.....	81
Figure II-13 Incident angle versus Tdiff for C3 in the temperature range from 30°F to 50°F Nov 19, 2003-Nov.25, 2003.....	82
Figure II-14 Incident angle versus Tdiff for C3 in the temperature range from 50°F to 70°F Nov 19, 2003-Nov.25, 2003.....	82
Figure II-15 Incident angle versus Tdiff for C3 in the temperature range from 70°F to 90°F Nov 19, 2003-Nov.25, 2003.....	83
Figure II-16 Solar Radiation versus Tdiff for C1 in the temperature range from 50°F to 70°F June 28, 2003 - July 4, 2003.....	83

Figure II-17 Solar Radiation versus Tdiff for C1 in the temperature range from 70°F to 90°F June 28, 2003 - July 4, 2003.....	84
Figure II-18 Solar Radiation versus Tdiff for C2 in the temperature range from 50°F to 70°F June 28, 2003 - July 4, 2003.....	84
Figure II-19 Solar Radiation versus Tdiff for C2 in the temperature range from 70°F to 90°F June 28, 2003 - July 4, 2003.....	85
Figure II-20 Solar Radiation versus Tdiff for C3 in the temperature range from 50°F to 70°F June 28, 2003 - July 4, 2003.....	85
Figure II-21 Solar Radiation versus Tdiff for C3 in the temperature range from 70°F to 90°F June 28, 2003 - July 4, 2003.....	86
Figure II-22 Solar Radiation versus Tdiff for C1 in the temperature range from 30°F to 50°F Nov.19, 2003 – Nov.25, 2003.....	86
Figure II-23 Solar Radiation versus Tdiff for C1 in the temperature range from 50°F to 70°F Nov.19, 2003 – Nov.25, 2003.....	87
Figure II-24 Solar Radiation versus Tdiff for C1 in the temperature range from 70°F to 90°F Nov.19, 2003 – Nov.25, 2003.....	87
Figure II-25 Solar Radiation versus Tdiff for C2 in the temperature range from 30°F to 50°F Nov.19, 2003 – Nov.25, 2003.....	88
Figure II-26 Solar Radiation versus Tdiff for C2 in the temperature range from 50°F to 70°F Nov.19, 2003 – Nov.25, 2003.....	88
Figure II-27 Solar Radiation versus Tdiff for C2 in the temperature range from 70°F to 90°F Nov.19, 2003 – Nov.25, 2003.....	89
Figure II-28 Solar Radiation versus Tdiff for C3 in the temperature range from 30°F to 50°F Nov.19, 2003 – Nov.25, 2003.....	89
Figure II-29 Solar Radiation versus Tdiff for C3 in the temperature range from 50°F to 70°F Nov.19, 2003 – Nov.25, 2003.....	90
Figure II-30 Solar Radiation versus Tdiff for C3 in the temperature range from 70°F to 90°F Nov.19, 2003 – Nov.25, 2003.....	90
Figure II-31 Inlet Temperature versus Tdiff for C1 in the temperature range from 50°F to 70°F June 28, 2003 – July 4, 2003.....	91
Figure II-32 Inlet Temperature versus Tdiff for C1 in the temperature range from 70°F to 90°F June 28, 2003 – July 4, 2003.....	91
Figure II-33 Inlet Temperature versus Tdiff for C2 in the temperature range from 50°F to 70°F June 28, 2003 – July 4, 2003.....	92
Figure II-34 Inlet Temperature versus Tdiff for C2 in the temperature range from 70°F to 90°F June 28, 2003 – July 4, 2003.....	92
Figure II-35 Inlet Temperature versus Tdiff for C3 in the temperature range from 50°F to 70°F June 28, 2003 – July 4, 2003.....	93
Figure II-36 Inlet Temperature versus Tdiff for C3 in the temperature range from 70°F to 90°F June 28, 2003 – July 4, 2003.....	93
Figure II-37 Inlet Temperature versus Tdiff for C1 in the temperature range from 30°F to 50°F Nov.19, 2003 – Nov.25, 2003.....	94
Figure II-38 Inlet Temperature versus Tdiff for C1 in the temperature range from 50°F to 70°F	

Nov.19, 2003 – Nov.25, 2003.....	94
Figure II-39 Inlet Temperature versus Tdiff for C1 in the temperature range from 70°F to 90°F	
Nov.19, 2003 – Nov.25, 2003.....	95
Figure II-40 Inlet Temperature versus Tdiff for C2 in the temperature range from 30°F to 50°F	
Nov.19, 2003 – Nov.25, 2003.....	95
Figure II-41 Inlet Temperature versus Tdiff for C2 in the temperature range from 50°F to 70°F	
Nov.19, 2003 – Nov.25, 2003.....	96
Figure II-42 Inlet Temperature versus Tdiff for C2 in the temperature range from 70°F to 90°F	
Nov.19, 2003 – Nov.25, 2003.....	96
Figure II-43 Inlet Temperature versus Tdiff for C3 in the temperature range from 30°F to 50°F	
Nov.19, 2003 – Nov.25, 2003.....	97
Figure II-44 Inlet Temperature versus Tdiff for C3 in the temperature range from 50°F to 70°F	
Nov.19, 2003 – Nov.25, 2003.....	97
Figure II-45 Inlet Temperature versus Tdiff for C3 in the temperature range from 70°F to 90°F	
Nov.19, 2003 – Nov.25, 2003.....	98

### **Appendix III Stepwise Regression Models**

Figure III-1. Stepwise regression output for C1-1.....	99
Figure III-2. Stepwise regression output for C1-2.....	100
Figure III-3. Stepwise regression output for C1-3.....	100
Figure III-4. Stepwise regression output for C2-1.....	101
Figure III-5. Stepwise regression output for C2-2.....	102
Figure III-6. Stepwise regression output for C2-3.....	102
Figure III-7. Stepwise regression output for C3-1.....	103
Figure III-8. Stepwise regression output for C3-2.....	104
Figure III-9. Stepwise regression output for C3-3.....	104

### **Appendix IV Output from the Regression Model**

Figure IV-1. Regression output for C1-1.....	105
Figure IV-2. Regression output for C1-2.....	106
Figure IV-3. Regression output for C1-3.....	106
Figure IV-4. Regression output for C2-1.....	107
Figure IV-5. Regression output for C2-2.....	107
Figure IV-6. Regression output for C2-3.....	108
Figure IV-7. Regression output for C3-1.....	109
Figure IV-8. Regression output for C3-2.....	109
Figure IV-9. Regression output for C3-3.....	110

### **Appendix V Test for the Predictability of the Regression Models**

Figure V-1. Regression output for C1-1's predictability.....	111
Figure V-2. Plot of the regression output for C1-1's predictability.....	111
Figure V-3. Regression output for C1-2's predictability.....	112
Figure V-4. Plot of the regression output for C1-2's predictability.....	112

Figure V-5. Regression output for C1-3's predictability.....	113
Figure V-6. Plot of the regression output for C1-3's predictability.....	113
Figure V-7. Regression output for C2-1's predictability.....	114
Figure V-8. Plot of the regression output for C2-1's predictability.....	114
Figure V-9. Regression output for C2-2's predictability.....	115
Figure V-10. Plot of the regression output for C2-2's predictability.....	115
Figure V-11. Regression output for C2-3's predictability.....	116
Figure V-12. Plot of the regression output for C2-3's predictability.....	116
Figure V-13. Regression output for C3-1's predictability.....	117
Figure V-14. Plot of the regression output for C3-1's predictability.....	117
Figure V-15. Regression output for C3-2's predictability.....	118
Figure V-16. Plot of the regression output for C3-2's predictability.....	118
Figure V-17. Regression output for C3-3's predictability.....	118
Figure V-18. Plot of the regression output for C3-3's predictability.....	119
