

DEDICATION

I dedicate this thesis to my parents, John and Linda Raines, who have loved and supported me throughout my life. They have taught me that anything can be achieved through hard work and they have helped make me the person I am today.

ACKNOWLEDGEMENTS

I want to thank the following people who have helped me with this project because I could not have completed this project without their help.

THANK YOU

Henry Dickerson

Tina Shanklin

Chuck Shorter

Leslie Ellyson

Daniel Allen

Glenn Johnson

Emily Smith

John Raines

CHAPTER V – SUMMARY AND CONCLUSIONS.....	163
VITA.....	168

LIST OF FIGURES

Figure		Page
CHAPTER III		
1	Map of N-fertilized tall fescue and alfalfa-tall fescue paddocks at the Virginia Tech Kentland Farm, Blacksburg, VA.....	58
2	Exclosure movement diagram for paddock 1A during the 2003 season at the Virginia Tech Kentland Farm, Blacksburg, VA.....	62
3	2002 monthly precipitation - Virginia Tech Kentland Farm, Blacksburg, VA.....	80
4	2003 monthly precipitation - Virginia Tech Kentland Farm, Blacksburg, VA.....	82
CHAPTER IV		
1	Map of N-fertilized tall fescue and alfalfa-tall fescue paddocks at the Virginia Tech Kentland Farm, Blacksburg, VA.....	127
2	Forage mass of N-fertilized tall fescue and alfalfa-tall fescue mixtures in 2002 and 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....	140
3	2002 monthly precipitation - Virginia Tech Kentland Farm, Blacksburg, VA.....	141
4	2003 monthly precipitation - Virginia Tech Kentland Farm, Blacksburg, VA.....	144

LIST OF TABLES

Table	Page
CHAPTER III	
1	Skeletal analysis of variation (ANOVA) with degrees of freedom for Experiment I. Effects of defoliation height and frequency on alfalfa and tall fescue grown in mixed stands at the Virginia Tech Kentland Farm, Blacksburg, VA.....67
2	Pesticides used in establishment and maintenance of mixed stands with alfalfa cultivars interseeded into tall fescue at Blacksburg, Glade Springs, and Steeles Tavern.....71
3	Alfalfa and total biomass production (alfalfa, tall fescue, annual grasses, weeds) from alfalfa-tall fescue pastures clipped at 7.6 cm from wire exclosures compared across the 2002 season at the Virginia Tech Kentland Farm, Blacksburg, VA.....76
4	Alfalfa and total biomass production (alfalfa, tall fescue, annual grasses, weeds) from alfalfa-tall fescue pastures clipped at 7.6 cm from wire exclosures compared across the 2003 season at the Virginia Tech Kentland Farm, Blacksburg, VA.....77
5	Alfalfa, tall fescue, and weed botanical composition from alfalfa-tall fescue pastures clipped at 7.6 cm from wire exclosures during the 2002 and 2003 seasons at the Virginia Tech Kentland Farm, Blacksburg, VA.....78
6	Influence of defoliation height on change in alfalfa botanical composition under short rest period exclosures in alfalfa-tall fescue pastures in 2002 and 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....87
7	Influence of rest period on change in alfalfa botanical composition clipped at 7.6 cm under exclosures in alfalfa-tall fescue pastures in 2002 and 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....89
8	Influence of defoliation height on change in tall fescue botanical composition under short rest period exclosures in alfalfa-tall fescue pastures in 2002 and 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....91

Table	Page
9 Influence of defoliation height and rest period on change in tall fescue botanical composition under exclosures in alfalfa-tall fescue pastures in 2002 and 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....	93
10 Influence of defoliation height on change in weed botanical composition under short rest period exclosures in alfalfa-tall fescue pastures in 2002 and 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....	96
11 Alfalfa persistence under permanent exclosures in alfalfa-tall fescue pastures defoliated to 7.6 cm in 2002 and 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....	98
12 Pearson's correlation coefficients for alfalfa plant counts, visual estimates of alfalfa percent cover, and alfalfa occupancy measurements for 2002 and 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....	101
13 Influence of defoliation height on tall fescue persistence under permanent exclosures in alfalfa-tall fescue pastures in 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....	103
14 Tall fescue persistence under permanent exclosures in alfalfa-tall fescue pastures defoliated to 7.6 cm in 2002 at the Virginia Tech Kentland Farm, Blacksburg, VA.....	104
15 Alfalfa plant counts of cultivars seeded on 5 Apr. 2002 in mixed stands with tall fescue under rotational stocking at the Virginia Agricultural Experiment Center, Glade Springs, VA.....	107
16 Alfalfa plant counts of cultivars seeded on 2 Apr. 2002 in mixed stands with tall fescue under rotational stocking at the Virginia Tech Kentland Farm Blacksburg, VA.....	109
17 Alfalfa plant counts of cultivars seeded on 3 Apr. 2003 in mixed stands with tall fescue under rotational stocking at the Virginia Tech Kentland Farm, Blacksburg, VA.....	111
18 Alfalfa plant counts of cultivars seeded on 29 Mar. 2002 in mixed stands with tall fescue under rotational stocking at the Virginia Agricultural Experiment Center, Steeles Tavern, VA.....	113

- 19 Alfalfa plant counts of cultivars seeded on 24 Apr. 2003 in mixed stands with tall fescue under rotational stocking at the Virginia Agricultural Experiment Center, Steeles Tavern, VA.....114

CHAPTER IV

- 1 Pesticides used in establishment and maintenance of alfalfa-tall fescue mixtures and N-fertilized tall fescue at the Virginia Tech Kentland Farm, Blacksburg, VA.....130
- 2 Rotation of steers throughout the alfalfa-tall fescue and pure tall fescue paddocks in 2002 at the Virginia Tech Kentland Farm, Blacksburg, VA.....133
- 3 Rotation of steers throughout the alfalfa-tall fescue and pure tall fescue paddocks in 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....134
- 4 Alfalfa, tall fescue, crabgrass, and weed percent cover in the alfalfa-tall fescue and pure tall fescue pastures in 2002 at the Virginia Tech Kentland Farm, Blacksburg, VA.....142
- 5 Alfalfa, tall fescue, and weed percent cover in the alfalfa-tall fescue and pure tall fescue pastures in 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.145
- 6 Percent dry matter, ash, crude protein, and fiber of N-fertilized tall fescue and alfalfa-tall fescue mixtures in 2002 at the Virginia Tech Kentland Farm, Blacksburg, VA.....150
- 7 Percent dry matter, ash, crude protein, and fiber of N-fertilized tall fescue and alfalfa-tall fescue mixtures in 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....152
- 8 Animal performance of steers grazing N-fertilized tall fescue and alfalfa-tall fescue mixtures in 2002 at the Virginia Tech Kentland Farm, Blacksburg, VA.....155
- 9 Animal performance of steers grazing N-fertilized tall fescue and alfalfa-tall fescue mixtures in 2003 at the Virginia Tech Kentland Farm, Blacksburg, VA.....157
