To: Nazia Munir <nmunir@vt.edu>, "Mullin, Scott" <smullin@osa.org>, pubscopyright <copyright@osa.org>

Dear Nazia Munir,

Thank you for contacting The Optical Society (OSA).

Because you are the author of the source paper from which you wish to reproduce material, OSA considers your requested use of its copyrighted materials to be permissible within the author rights granted in the Copyright Transfer Agreement submitted by the requester on acceptance for publication of his/her manuscript. If the entire article is being included, it is requested that the Author Accepted Manuscript (or preprint) version be the version included within the thesis and that a complete citation of the original material be included in any publication. This permission assumes that the material was not reproduced from another source when published in the original publication.

The Author Accepted Manuscript version is the preprint version of the article that was accepted for publication but not yet prepared and/or formatted by The Optical Society or its vendors.

While your publisher should be able to provide additional guidance, OSA prefers the below citation formats:

For citations in figure captions:

[Reprinted/Adapted] with permission from [ref #] © The Optical Society. (Please include the full citation in your reference list)

For images without captions:

Please let me know if you have any questions.

Kind Regards,

Hannah Greenwood
Hi,

Hope everything is going well for you. I am a PhD candidate in Mechanical Engineering at Virginia Tech. One of my contributions has been published at JOSA, Vol. 36(10), pp. 1675-1689, October 2019 titled

"First-principle Model for the Directional Spectral Absorptivity of Gold-Black in the near Infrared"

I need your permission in order to include the journal paper as a chapter in my thesis. Can you please accept my request and give me the permission.

Thanks,

Nazia
