

Virginia Tech Graduate School  
Re: Permission for use of Work

To Whom It May Concern,

I am writing this letter to show that AGU gives permission for my published manuscript "Evidence for Slip on a Border Fault Triggered by Magmatic Processes in an Immature Continental Rift" in the AGU Journal - Geochemistry, Geophysics, Geosystems to be used in my dissertation work titled "Investigating volcano tectonic interactions in the Natron Rift of the East African Rift System" as Chapter 1.

AGU specifically states "AGU does allow posting of preprints and accepted papers in preprint servers that are designed to facilitate community engagement and discovery across the sciences". When a preprint is used it is required that the statement "An edited version of this paper was published by AGU. Copyright (year) American Geophysical Union" and the full citation and DOI be included. AGU also states that the definition of previously published explicitly does not include oral or poster presentations, meeting abstracts or student theses/dissertations. (From AGU Permissions website <https://www.agu.org/Publish-with-AGU/Publish/Author-Resources/Policies/Permission-policy#repository> ). This specific statement is included on the title page of Chapter 1.

Chapter 2 and Chapter 3 of the dissertation have been prepared to be published but have not been submitted.

Sincerely,

Dr. Joshua Robert Jones
