Hi Dr Li and Yi,
Hope you are doing well.

As one of the corrections for my thesis submission, I would need to provide an email copy stating that anyone who has contributed in making the figures gives me permission to use those figures in my thesis.

Hence, I wanted to request Dr Li and Yi if I could please receive the permission to use the heatmap, Umap and dot plot figures (Figure 2 A, B and C) we added on our monocyte exhausting paper to my thesis work?

Thank you.

Best,
Kisha

Of course, as long as Dr Li agree.

Kisha, you have the permission from my side. Did you send an email to the publisher to request also?
Usually the student will ask the publisher and the publisher will grant that.

Thankyou all.

I did request permission from Journal of Immunology for my first paper. But the second paper was under review when I submitted the thesis draft.

I will request Frontiers of Immunology for permission too.

Best,
Kisha
