

**Figure 16.** Test of the *EcoR* I partial genomic DNA library for the presence of the DdRPA1 genes by using PCR. The templates were: lane 1: genomic DNA; lane 2: *EcoR* I partial library tube 1, 2, and 3; lane 3: *EcoR* I partial library tube 4, 5, and 6; lane 4: *EcoR* I partial library tube 7, 8, and 9; lane 5: *EcoR* I partial library tube 10, 11, and 12; lane 6: *EcoR* I partial library tube 13, 14, and 15; lane 7: lambda *sty* I DNA standard. The primer pair was 8I-2 (sense) <---> 8I-1c (antisense) degenerate primers.
