

Figure 17. Restriction enzyme digestion of plasmid DNA from *EcoR* I partial library for the N-terminal region of the DdRPA1 gene. Lane 1: Lambda *Sty* I DNA standard; lane 2: *Bam*H I digestion of plasmid DNA; lane 3: *Eco*R I digestion of plasmid DNA. The 2 kb insert contains the promoter and N-terminal region of the 62 kDa (81 kDa) subunit.
