

Figure 31. Southern analysis for construction of genomic sub-library. **A:** Southern analysis of genomic DNA. **B:** Agarose gel electrophoresis of digested genomic DNA. Twenty five micrograms of genomic DNA was used in each lane. Lane 1: Lambda *sty* I standard; lane 2: *Hind* III digestion; lane 3: *Eco*R I digestion; lane 4: *Hind* III and *Eco*R I double digestion.
