

Figure 33. PCR assay of fractions of genomic DNA fragments from *Hind* III digestion . Lane 1: 100bp DNA ladder standard. The PCR templates were: lane 2: water; lane 3:*Hind* III fragments fraction I; lane 4:*Hind* III fragments fraction II; lane 5: *Hind* III fragments fraction III; lane 6: *Hind* III fragments fraction IV; Lane 7: *Hind* III fragments fraction V; lane 8: *Hind* III fragments fraction VI; lane 9: genomic DNA as the template. The primer pair was *clr3* (sense) <---> *clr2* (antisense).
