

**Figure 50.** Standard for the Northern analysis of the DdRPA1 (Northern blot analysis of actin8 mRNA) Four micrograms of total RNA purified from different developmental time points were used in each lane. The developmental time points were: lanes 1 and 2: 0 hr; lane 3: 4 hr; Lane 4: 8 hr; lane 5: 12 hr total RNA; lane 6: 16 hr; lane 7: 20 hr. Lane 1: the total RNA was purified from non-plated cells; lanes 2 to 7: the total RNA was purified from plated cells. The actin8 PCR fragment was the probe.
