

Virginia Tech Soil Testing Laboratory  
**Soil Sample Information Sheet for  
 Home Lawns, Gardens, Fruits,  
 and Ornamentals**

**Please Print**

INSTRUCTIONS: See other side for sampling instructions. For a recommendation, be sure to fill in the **plant code number**. Place check marks (✓) where appropriate. Use another form for commercial crop production. Send samples, forms, and payment to Virginia Tech Soil Testing Lab, 145 Smyth Hall (0465), Blacksburg, VA 24061, in a sturdy shipping carton. For large shipments, total box weight must be less than 70 pounds.

**PLANT CODE LIST**

← insert code number to the left

**Lawn: Kentucky Bluegrass or Fescue**

- 201 Establishing New Lawn
- 202 Maintaining Lawn, Repair of Bare Spots

**Lawn: Bermudagrass or Zoysiagrass**

- 203 Establishing New Lawn
- 204 Maintaining Lawn, Repair of Bare Spots

**Garden**

- 210 Vegetable Garden
- 211 Flower Garden
- 212 Roses

**Acid-Loving Shrubs**

- 240 Azaleas
- 241 Andromedas
- 242 Camellias
- 243 Laurel
- 244 Rhododendron

**Non-Acid Loving Shrubs & Trees**

- 245 Shrubs - Lilac, Forsythia, Boxwood, etc.
- 246 Trees - Pine, Maple, Oak, etc.

**Fruits**

- 220 Apples
- 221 Blackberries
- 222 Blueberries
- 223 Currants
- 224 Gooseberries
- 225 Grapes
- 226 Nectarines
- 227 Peaches
- 228 Pears
- 229 Plums
- 230 Quince
- 231 Raspberries
- 232 Sour Cherry
- 233 Strawberries
- 234 Sweet Cherries

**House Plants**

- 250 Potted House Plants

**SOIL TESTS DESIRED**

- Routine (soil pH, P, K, Ca, Mg, Zn, Mn, Cu, Fe and B)
- Organic Matter
- Soluble Salts
- Fax Results: FAX # ( \_\_\_\_\_ ) \_\_\_\_\_

	COST PER SAMPLE	
	IN-STATE	OUT-OF-STATE
<input type="checkbox"/> Routine	\$ 7.00	\$10.50
<input type="checkbox"/> Organic Matter	\$ 3.00	\$ 4.50
<input type="checkbox"/> Soluble Salts	\$ 3.00	\$ 4.50
<input type="checkbox"/> Fax Results	\$ 1.00	\$ 1.50

Send in payment along with soil sample and form; make check or money order payable to "Treasurer, Virginia Tech."

### Important:

For test results to be meaningful extreme care must be used when soil samples are taken. Each sample represents many tons of soil in your lawn or garden. Test results cannot be any more accurate than the sample submitted to the laboratory. **Do not** take samples when the soil is extremely wet.

### Sampling Instructions:

Divide your lawn or garden into sampling areas. Each area should be uniform in the kind of soil and in the past fertilizer and lime treatment it has received. An example would be separate samples (areas) for front and back lawns. For **shrubs and trees**, select an area from the trunk to the outer edges of the branches. Take a separate sample from each area as shown in the diagram below.

The following procedure should be followed for each sampling area:

- A --- Take samples with a trowel, shovel, spade, or auger. Make a vertical cut 4" deep for lawns, or to plowing depth for gardens, and push the soil aside. Then cut a thin slice from the side of the opening that is of uniform thickness, approximately 2" in width, and extending from the top of the ground to the depth of the cut. Scrape away or discard any surface mat of grass or litter and place the slice of soil into a clean bucket or other container. This sampling procedure should be followed in 10 or more different locations within each sampling area, each time placing the resulting soil in the same container, giving you a composite sample.
- B --- Thoroughly mix the soil from the composite sample and then fill the sample box to the top from the mixture. Fill in the information requested on the side of the sample box, including sample number, complete the other side of this sheet, and send sample, sheet, and payment directly to the Soil Testing Laboratory.

### How To Take Composite Samples of Each Bed or Section
