

# *ICTAS at NCR*

*VT-Serge Meeting*  
*05/04/2011*

- **ICTAS overview**
- **ICTAS at NCR**
  - Motivation
  - Research Program
  - Looking ahead
- **Q & A**

Roop L. Mahajan

Tucker Chair Professor  
Director, ICTAS  
mahajanr@vt.edu

## 1. ICTAS acts a catalyst for Interdisciplinary Research

- *At the intersection of Engineering & the Sciences—Physical, life and social*

**“Buds of creativity bloom at intersections.” mahajan**

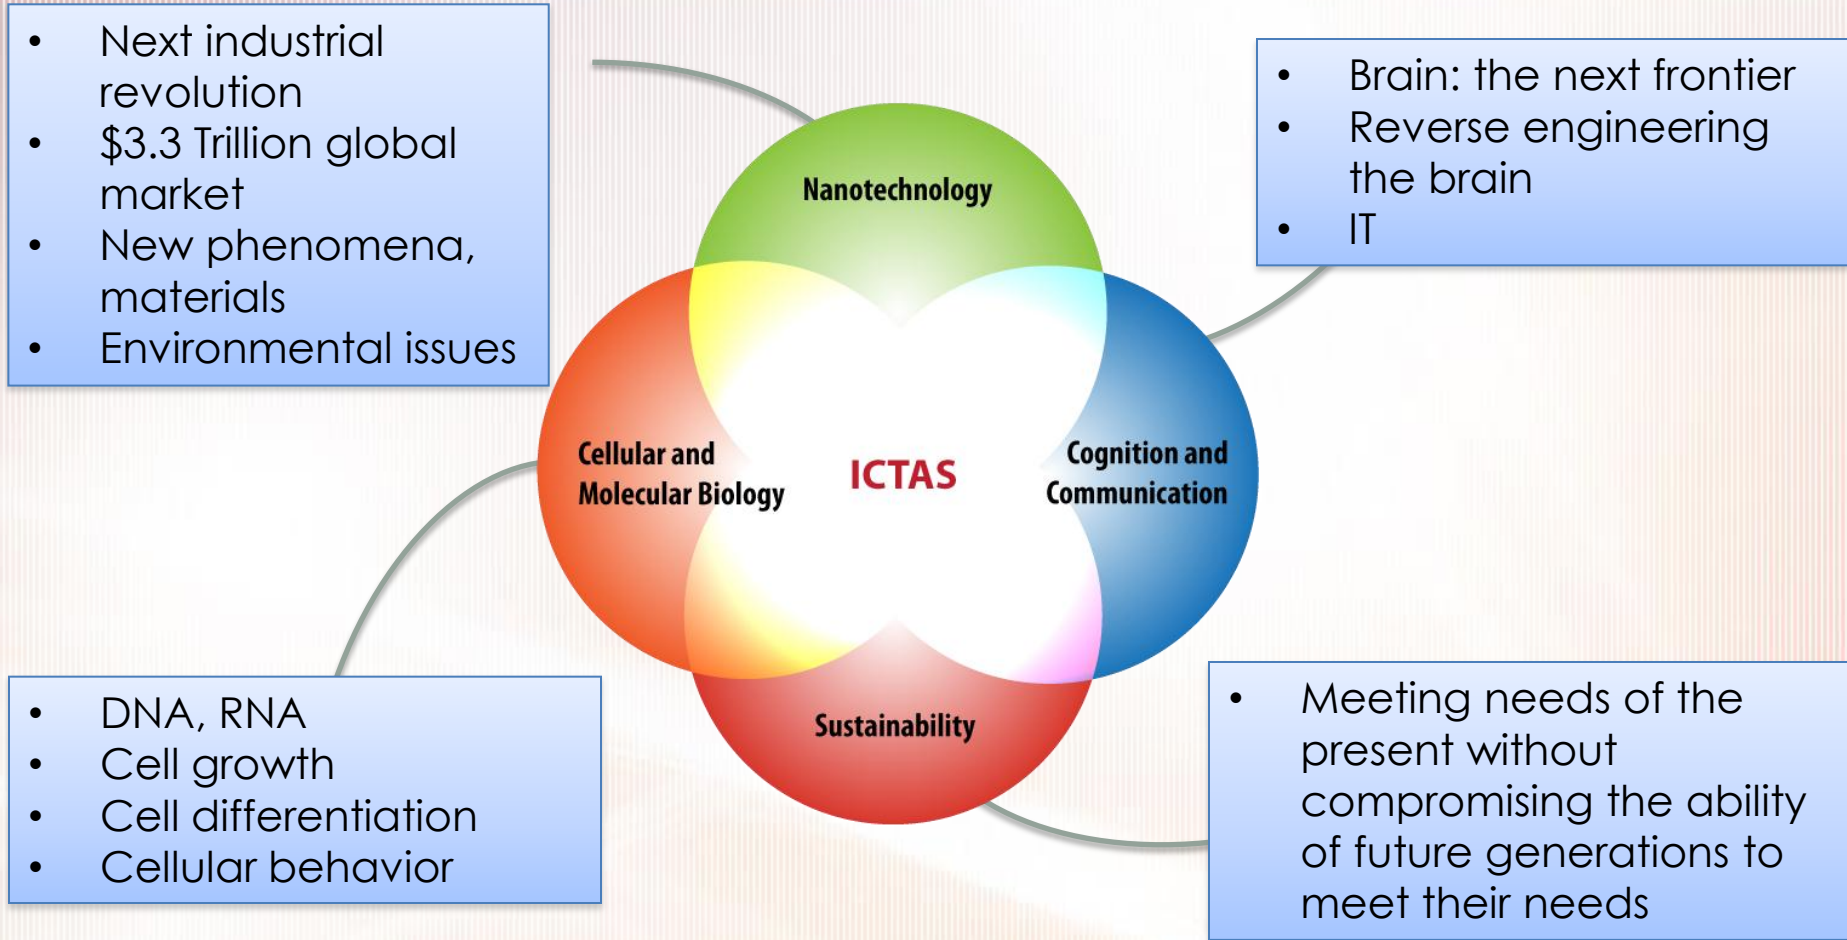

## **2. ICTAS is dedicated to cutting edge research at the confluence of transformative technologies**

Each of these technologies has tremendous potential for impacting our lives

# ICTAS Research

**3. ICTAS research is designed for non-linear growth and a dominant position in the field.**

- **Among the top three**
- **16-20 faculty; 32-40 Ph. D. students**

**4. ICTAS research is innovative with a healthy dose of blue-skies component, and is faculty-centric**

➤ **IT IS ALSO ABOUT THE NEXT BLACK SWAN**

# Game-Changer Technologies & Black Swans

- **A Black Swan** is an event that has three characteristics;
  - it is an outlier
  - it carries an extreme impact
  - it has retrospective predictability.

"The Black Swan", by Nassim Nicholas Taleb

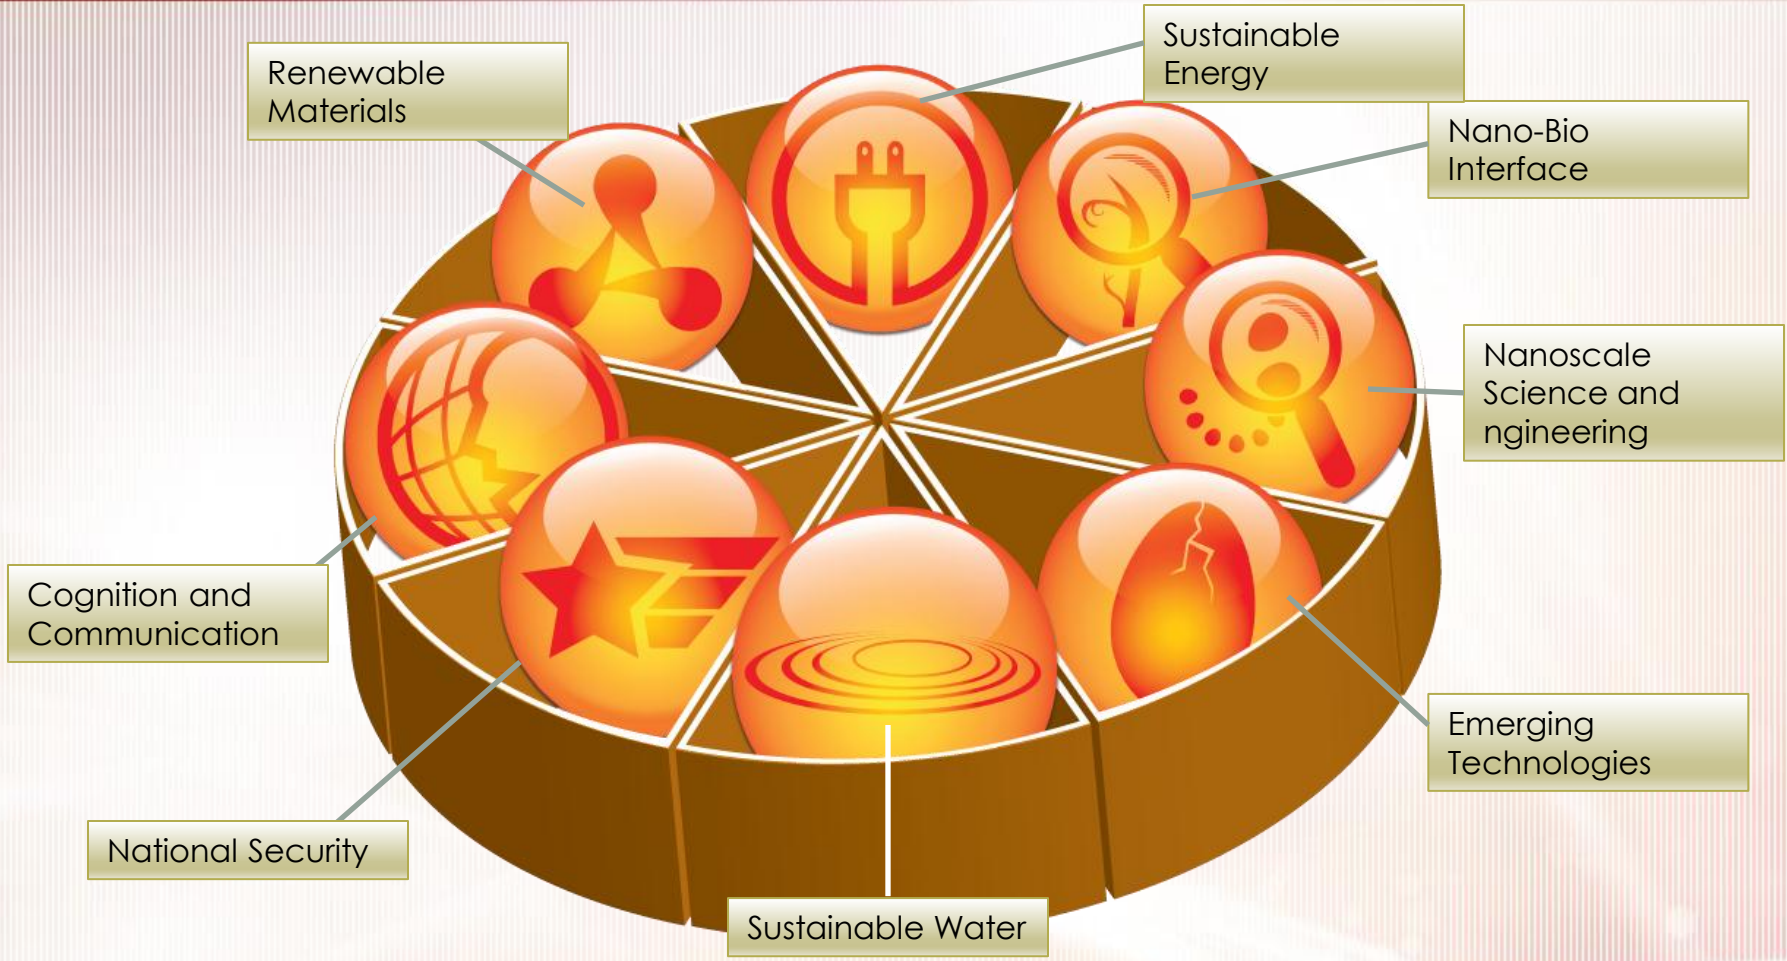

Internet **Computer** Laser

- **The Black Swan Seminars– Café X**  
*An informal discussion of the future*

**WHAT WILL MAKE YOU IRRELEVANT IN 7 years?**

# Research Thrusts

- Environmental Nano-science and Technology
- Nano-materials including carbonaceous materials
- **Nano-sensors**
- Nano-devices
- Nano-composites
- Nano-fibers
- **Nano-Computation**

- Targeted Delivery of Nano-medicine
- Non-invasive Sensing and Diagnosis
- Inflammation
- **Bio-Imaging**
- **Biomedical Computing & Cellular Engineering Microsystems (CEMS)**
- System Biology of Engineered Tissues
- Veterinary Regenerative Medicine

SBES    M-BEDS    ISBET    CFI  
GU    CVRM    WFU

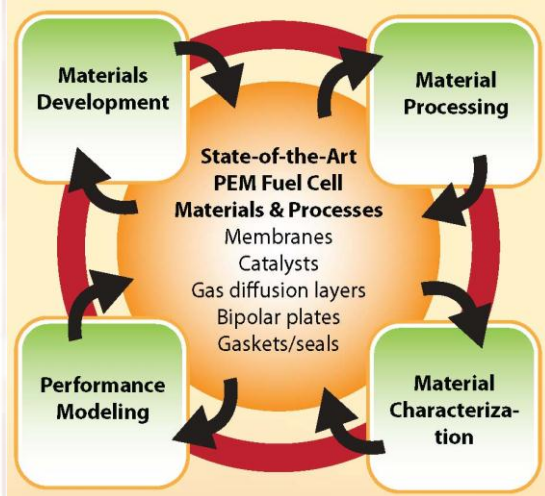

**Technology to meet society's energy needs – renewably and responsibly**

## Principle areas of research

- *Cleaner more efficient energy conversion systems*
  - *Fuel cells*
- *Renewable energy resources*
  - *Solar*
    - *Organic Photovoltaic cells*
    - *Multi-junction solar cells*
    - *Wind energy*
  - *Bio-fuels*
  - *Energy harvesting*
- *Clean Coal Energy*
- *Energy Efficient Buildings*
- *Smart Grid*

**Thrust Leader:** Michael Ellis (ME)

**Associated Faculty:** More than 30 faculty members from 7 departments in the Colleges of Science and Engineering.

- **IDIQ with Dahlgren**
- **Ground Unmanned Support Surrogate (GUSS)**
  - A “flagship” project with NSWC Dahlgren for Marine Corps War-fighting Lab.
  - Four Vehicles participated in Rim of Pacific (RIMPAC) Exercise 2010
  - Operated by Marines
  - Significant Press Interest

*“GUSS surprised everybody with its growth and technological capability.”*

*-Vince Goulding, Director*

*Experiments Division Marine Corps War fighting Lab*

- **Autonomous Vehicles**
- **Sensor and sensor fusion**
- **Cyber Security**

- Modes of operation
  - GPS/Waypoint Sight
  - “Follow Me”
  - Drive by Wire
  - Manual

- **Humanoid Hospital**
- ***Discovery Analytics***
- **Space@VT**
  - Cubesat technology for geospace exploration.
- **Innovation- based Manufacturing**
- **Bio-Inspired Science and Technology**
  - ***Bats- digitalization & simulation; Smithsonian***

# Infrastructure

ICTAS HQ

ICTAS CRC

ICTAS LSC

ICTAS NCR

# Motivation

## ICTAS by the numbers

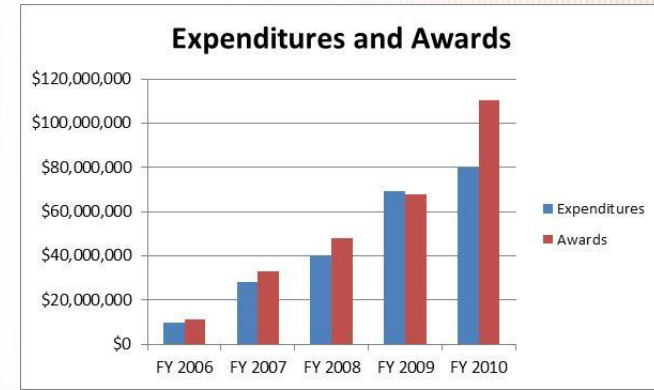

# Motivation

## ICTAS by the numbers

# *ICTAS at NCR*

## *Motivation*

- **Collaborative laboratory space essential to research growth**
- **All the ICTAS space in Blacksburg almost fully occupied**
- **NCR offers an opportunity in both space and ecology**
- **Can grow research expenditures at a faster clip > 2x in 5 years**
  - Target 3x in 6 including slow growth during the initial period of investment extended over 2-3 years

# ICTAS at NCR Research Areas

- Current space ~7,000 SF; usable: ~3,000 SF
  - Six Offices ~ 1,200 SF
  - 3 Labs ~ 1,800 SF
- Catalyst for **three clusters**
  - **Cyber Security**
    - Anchor Faculty (AF): **Prof. Charles Clancy** (ECE); CS Faculty (Prof. Ramakrishnan and a new hire)
  - **Energy/Nuclear Energy**
    - AF: **Prof. Alireza Haghighat** (ME); Dr. Satish Kulkarni (ICTAS), Prof. Diana Farkas (MSE)
    - *Synergy with ARI (In progress): Prof. Saifur Rahman (ECE)*
  - **Discovery Analytics**
    - AF: Prof. **Dr. Naren Ramakrishnan** (CS)
- **Emerging Research Area**
  - **Biomedical & Nanoscale Computation**
    - AF: Profs. **Joseph Wang** (ECE), Diana Farkas, Naren Ramakrishnan, Roop Mahajan (ICTAS), Georgetown U

# Cyber Security

## AF: Professor Charles Clancy, ECE

- Cybersecurity Innovations Laboratory
  - Partnership with TBN Industry Sponsor and NPS
  - VT & NPS occupy 13 offices, 16 cubes, 6 labs
  - TBN Industry Sponsor occupies entire floor with cyber R&D and 24/7 network security operations center

Floor 6

Floor 5

### Research Themes

Secure mobile communications using COTS equipment and infrastructure

Security in the Cloud

Autonomic Network Defense

### **Significant Community of Interest for Cyber Security**

10 Academic Faculty  
20 Students & Post-docs  
10 Industry Researchers

Operational Facilities for Research Testing

Support for Classified Research

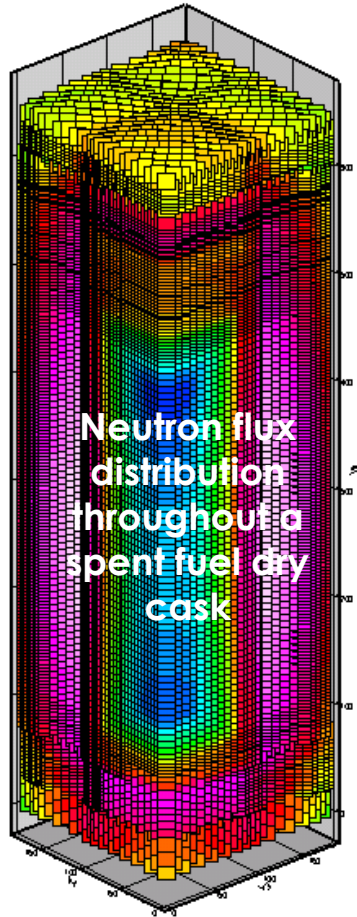

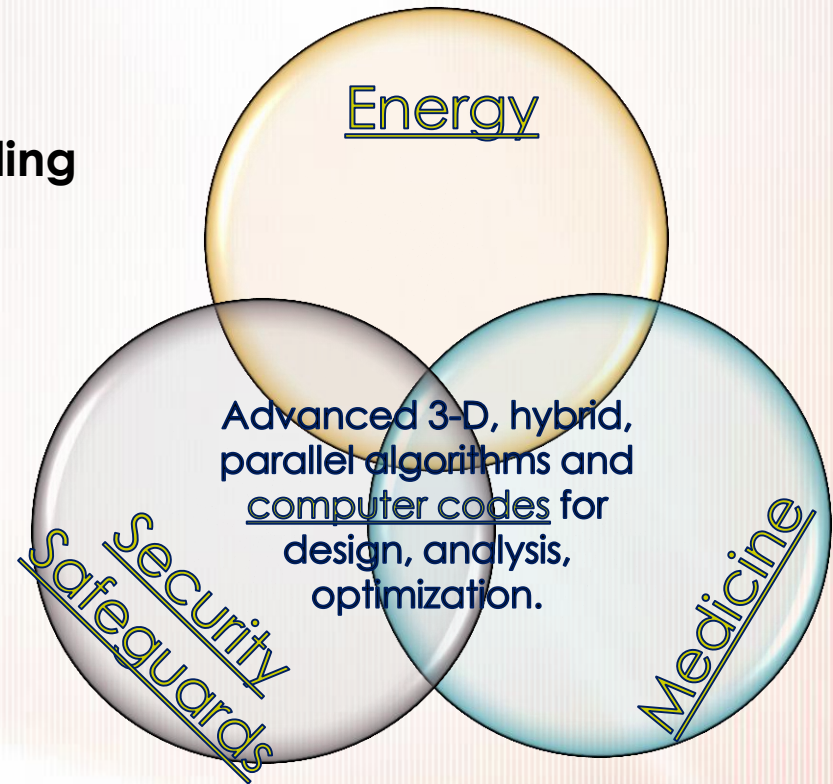

# Nuclear Energy

## AF: Professor Haghighat, ME

**Significant expertise  
In n advanced modeling**

With ADIES Automated  
Variance Reduction technique

**Particle Transport Parallel Computing & Visualization (PTPCV), NCR**

- A PC cluster with 120 CPUs and at least ~500 GB of memory

# *Nuclear Energy*

## *Prof. Haghghat's On-going projects*

- **Energy – Advanced Algorithms for Simulation of Advanced Reactors**  
funded by DOE-Nuclear Energy University Program (in collaboration with Georgia Tech) (\$214k, April 2011- July 2013)
- **Nuclear Security and Safeguards**  
An Innovative Hybrid Deterministic/Monte Carlo Radiation Transport Method for Modeling Radiation Sensor Systems, funded by DOE-NNSA (in collaboration with Georgia Tech) (\$207k, Jan 2011 – Sept 2012)  
  
Development of a Calculation Methodology for Determination of Detector Response for a Monitoring System for the Spent Fuel Pool, funded by LLNL (\$120k, Sept 2007-Oct 2011; \$60k contract with HSWTECH LLC)
- **Medicine**  
Deterministic methodology for image improvement of Single Photon Emission Computed Tomography (SPECT), submitted a proposal to DOE-Office of Science, (\$570 k, Oct 2011 – Sept 2014)

~ \$1.2 M

# *Nuclear Energy Growth*

## **Centers of excellence in the following areas:**

- Computational Modeling and Simulation (CMS) techniques and tools for nuclear systems;
- Design of detection systems for Nuclear Security and Safeguards, and
- Development of innovative imaging algorithms for radiation diagnostic devices.

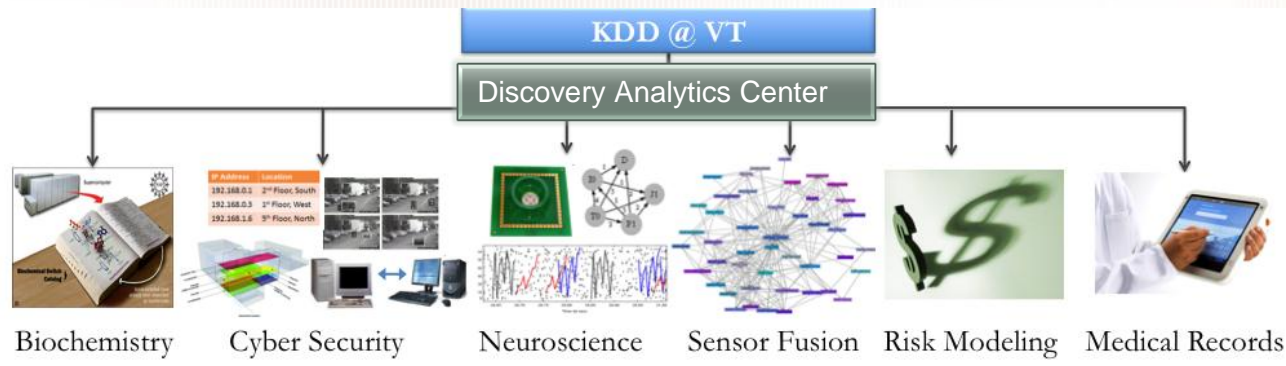

# Discovery Analytics

## AF: Prof. Naren Ramakrishnan\*, CS

- The use of **data mining** algorithms and analytics to foster knowledge discovery in diverse domains
  - Extracting non-trivial and actionable patterns from data
    - Terabytes/petabytes/even exabytes of data

# Nanoscale Computation

AF: Professor Diana Farkas, MSE

Diana Farkas

Experimental

Simulation

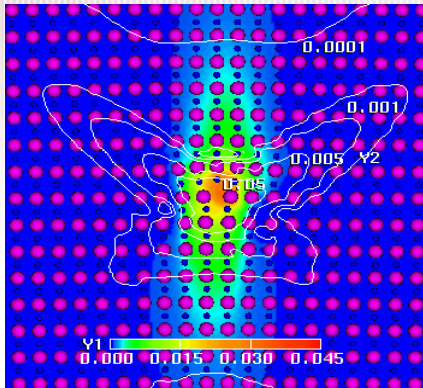

# Nanoscale computation Research Examples

**A**

Defects in nuclear materials

**B**

Nano-crystalline materials, and nanofoams for energy applications

**C**

Nanowires, nanoparticles, interface structure behavior

# Biomedical Computing

AF: Prof.  
Joseph Wang, ECE

- **Team:** 2 FTE tenure-track faculty members, 12 FT PhD-level GRAs, 1 res scientist.
- **Partnerships:** Johns Hopkins Medical Institutions, Georgetown University Medical Center, Children's National Medical Center, Wake Forest University Hospital, National Cancer Institute, University of Maryland Medical School.
- **Expertise:** Machine learning, signal processing, pattern recognition, biomedical imaging, systems theory.
- **Areas:** Bioinformatics, computational systems biology, medical imaging, genomic signal and data analysis, learning biological networks, biomarker discovery, genome-wide association study, proteomics data analysis, etc.
- **Sponsors:** National Institutes of Health, National Science Foundation, Department of Defense, NASA. Total \$14M research funds since 1996.

**EXTEND TO CEMS**  
**Strong collaboration with**  
**GW**  
**Dr. Chris Wilcox; MD/Ph.D.**  
**Nephrology & Hypertension**

# Discovery Analytics

## Growth Plan

### 3x in 6 years

#### ➤ **Cyber Security**

- “\$0.6 M in FY11 to \$6.5 M in FY18” ; **Conservative estimate** – Charles Clancy

#### ➤ **Discovery Analytics**

- Ph. D. graduates from 6 to 20
- Research expenditures: \$0.75M/yr to \$4-6M/yr
- Journal publications (in PNAS, Science, Nature, etc.): 1-2/yr to 4-5/yr
- Top-tier conference publications (<10% acceptance rate): 10/yr to 40/yr

#### ➤ **Nuclear Energy**

- Ph. D. graduates from 3 to 10
- Research Faculty: 1 to 3
- Affiliate faculty : 7 to 12
- Research expenditures: \$0.4M/yr to \$ 1.2 M/yr

# *Discovery Analytics*

## *Growth Plan*

### *3x in 6 years*

- **Strategic plans in all the research areas not fully defined yet.**
- **Elements in place**
- **Very optimistic about growth**
