Self-Consistency of the Lauritzen-Hoffman and Strobl Models of Polymer Crystallization Evaluated for Poly(ε-caprolactone) Fractions and Effect of Composition on the Phenomenon of Concurrent Crystallization in Polyethylene Blends

By

Swapnil Suhas Sheth

Dissertation submitted to the faculty of the Virginia Polytechnic Institute and State University in partial fulfillment of the requirements for the degree of Doctor of Philosophy

In

Chemistry

Hervé Marand, Chair
Robert Moore
Alan Esker
Richard Turner

September 27, 2013
Blacksburg, Virginia

Keywords: Polymer Crystallization, Poly(ε-caprolactone), Lauritzen-Hoffman Model, Strobl Model, Fractionation, Spherulite Growth Rate, Brochard-deGennes Theory, Lamellar Thickness, X-ray Scattering, Concurrent Crystallization, Co-crystallization
Draft 09/01/2009

Virginia Tech ETD Fair Use Analysis Results

This is not a replacement for professional legal advice but an effort to assist you in making a sound decision.

Name: Swapnil Sheth
Description of item under review for fair use: Hoffman, J. D.; Davis, G. T.; Lauritzen, J. I., Jr. Treatise Solid State Chem. 1976, 3, 497-614. Figure number N/A. One Figure only

Report generated on: 10-10-2013 at 23:31:36

Based on the information you provided:

Factor 1

Your consideration of the purpose and character of your use of the copyright work weighs: in favor of fair use

Factor 2

Your consideration of the nature of the copyrighted work you used weighs: in favor of fair use

Factor 3

Your consideration of the amount and substantiality of your use of the copyrighted work weighs: in favor of fair use

Factor 4

Your consideration of the effect or potential effect on the market after your use of the copyrighted work weighs: in favor of fair use

Based on the information you provided, your use of the copyrighted work weighs: in
favor of fair use
