Synthesis and Functionalization of Poly(ethylene oxide-b-ethyloxazoline) Diblock Copolymers with Phosphonate Ions

Alfred Yuen-Wei Chen

Thesis submitted to the Faculty of Virginia Polytechnic Institute and State University in partial fulfillment of the requirements for the degree of

Master of Science
In
Macromolecular Science and Engineering

Judy S. Riffle, Chair
James E. McGrath
Richey M. Davis

September 6, 2013
Blacksburg, Virginia

Keywords: poly(ethylene oxide), poly(2-ethyl-2-oxazoline), ion encapsulation, phosphonate, phosphonic acid, nanoparticles, functionalized random copolymer
Virginia Tech ETD Fair Use Analysis Results

Based on the information you provided:

Factor 1

Your consideration of the purpose and character of your use of the copyright work weighs: in favor of fair use

Factor 2

Your consideration of the nature of the copyrighted work you used weighs: in favor of fair use

Factor 3

Your consideration of the amount and substantiality of your use of the copyrighted work weighs: in favor of fair use

Factor 4

Your consideration of the effect or potential effect on the market after your use of the copyrighted work weighs: in favor of fair use

Based on the information you provided, your use of the copyrighted work weighs: in favor of fair use
