

Synthetic Enzymatic Pathway Conversion of Cellulosic Biomass to Hydrogen

Joseph Anthony Rollin

Dissertation submitted to the faculty of the Virginia Polytechnic Institute and State University in
partial fulfillment of the requirements for the degree of

Doctor of Philosophy
In
Biological Systems Engineering

Yi Heng Percival Zhang, Co-Chair
Justin R. Barone, Co-Chair
Aaron S. Goldstein
Ryan S. Senger
Brenda S. J. Winkel

23 August 2013
Blacksburg, VA

Keywords: synthetic enzymatic pathway (SyPaB), biohydrogen, cellulosic biofuel, cellulose
solvent- and organic solvent-based lignocellulose fractionation (COSLIF)

Acknowledgements to be used by RSC authors

Authors of RSC books and journal articles can reproduce material (for example a figure) from the RSC publication in a non-RSC publication, including theses, without formally requesting permission providing that the correct acknowledgement is given to the RSC publication. This permission extends to reproduction of large portions of text or the whole article or book chapter when being reproduced in a thesis.

The acknowledgement to be used depends on the RSC publication in which the material was published and the form of the acknowledgements is as follows:

- For material being reproduced from an article in *New Journal of Chemistry* the acknowledgement should be in the form:
 - [Original citation] - Reproduced by permission of The Royal Society of Chemistry (RSC) on behalf of the Centre National de la Recherche Scientifique (CNRS) and the RSC
- For material being reproduced from an article *Photochemical & Photobiological Sciences* the acknowledgement should be in the form:
 - [Original citation] - Reproduced by permission of The Royal Society of Chemistry (RSC) on behalf of the European Society for Photobiology, the European Photochemistry Association, and RSC
- For material being reproduced from an article in *Physical Chemistry Chemical Physics* the acknowledgement should be in the form:
 - [Original citation] - Reproduced by permission of the PCCP Owner Societies
- For material reproduced from books and any other journal the acknowledgement should be in the form:
 - [Original citation] - Reproduced by permission of The Royal Society of Chemistry

The acknowledgement should also include a hyperlink to the article on the RSC website.

The form of the acknowledgement is also specified in the RSC agreement/licence signed by the corresponding author.

Except in cases of republication in a thesis, this express permission does not cover the reproduction of large portions of text from the RSC publication or reproduction of the whole article or book chapter.

A publisher of a non-RSC publication can use this document as proof that permission is granted to use the material in the non-RSC publication.

Permissions

***PLEASE NOTE: If the links highlighted here do not take you to those web sites, please copy and paste address in your browser.**

Permission to reproduce Wiley journal Content:

Requests to reproduce material from John Wiley & Sons publications are being handled through the RightsLink® automated permissions service.

Simply follow the steps below to obtain permission via the Rightslink® system:

- Locate the article you wish to reproduce on Wiley Online Library (<http://onlinelibrary.wiley.com>)
- Click on the 'Request Permissions' link, under the 'ARTICLE TOOLS' menu on the abstract page (also available from Table of Contents or Search Results)

- Follow the online instructions and select your requirements from the drop down options and click on ‘quick price’ to get a quote
- Create a RightsLink® account to complete your transaction (and pay, where applicable)
- Read and accept our Terms & Conditions and download your license
- For any technical queries please contact customercare@copyright.com (<mailto:customercare@copyright.com>)
- For further information and to view a Rightslink® demo please visit www.wiley.com (<http://www.wiley.com>) and select Rights & Permissions.

AUTHORS - If you wish to reuse your own article (or an amended version of it) in a new publication of which you are the author, editor or co-editor, prior permission is not required (with the usual acknowledgements). However, a formal grant of license can be downloaded free of charge from RightsLink if required.

Photocopying

Teaching institutions with a current paid subscription to the journal may make multiple copies for teaching purposes without charge, provided such copies are not resold or copied. In all other cases, permission should be obtained from a reproduction rights organisation (see below) or directly from RightsLink®.

Copyright Licensing Agency

Institutions based in the UK with a valid photocopying and/or digital license with the Copyright Licensing Agency may copy excerpts from Wiley and Wiley-Blackwell books and journals under the terms of their license. For further information go to [CLA](http://www.cla.co.uk) (<http://www.cla.co.uk>).

Copyright Clearance Center

Institutions based in the US with a valid photocopying and/or digital license with the Copyright Clearance Center may copy excerpts from Wiley and Wiley-Blackwell books and journals under the terms of their license, please go to [CCC](http://www.copyright.com) (<http://www.copyright.com>).

Other Territories: Please contact your local reproduction rights organisation.

For further information please visit www.wiley.com (<http://www.wiley.com>) and select Rights & Permissions.

If you have any questions about the permitted uses of a specific article, please contact us.
