This feature issue includes a representative selection of topics that were presented at the Digital Holography and 3-D Imaging Topical Meeting held at Vancouver, British Columbia, Canada, April 2009. The issue contains articles in two distinct sections: an ISP section with review and invited articles that use the OSA Interactive Science Publishing (ISP)

system and contributed feature papers that contain original submissions. Research in the area of digital holography and 3-D imaging continues to be vibrant. The next topical meeting on the subject will be held in Miami, Florida, April 2010, <http://www.osa.org/meetings/topicalmeetings/DH/>, and readers are invited to attend.
