

ACKNOWLEDGEMENTS

I would like to thank my advisor Professor James R. Martin and the other committee members Professors Martin C. Chapman, J. Michael Duncan, Marte S. Gutierrez, James K. Mitchell and Mahendra P. Singh for their comments on the dissertation.

Financial support for this research was provided by the National Science Foundation (NSF) through grants titled "Preliminary Investigation and Implications of Improved Ground Performance during the 1999 Turkey Earthquakes" (CMS#0085281) and "Analysis of Improved Ground and Reinforced Soil Systems Performance during the 1999 Turkey and 2001 Nisqually Earthquakes Part 1 – Reinforced Soil Structures" (CMS#0201508). Additional support was provided by Earthquake Engineering Center for the Southeastern United States (ECSUS).

I would like to thank my advisor Jimmy Martin for providing me the freedom to work on my own. This helped me to hone my skills to work independently. In addition to the dissertation research, I had the opportunity to work with him on several challenging consulting projects throughout my time at Virginia Tech. Working with him was fun and it taught me a lot. Jimmy and his wife Jackie have been dear friends and a continuous source of support.

Martin Chapman was always available and willing to help throughout my studies. He has patiently answered my questions on seismology. I was able to learn a bit about earthquakes, thanks to the lengthy conversations with Martin. It was also great fun working with him on several interesting projects.

Marte Gutierrez was a great source of help on issues related to numerical analyses and constitutive modeling. His broad vision on these topics has helped me resolve important problems during my studies.

It was a privilege to know James Mitchell. His involvement with this research started with the reconnaissance following the Kocaeli Earthquake and he has been a major help throughout my studies. I have benefited greatly from his extensive expertise and wisdom.

Turan Durgunoglu has been the person that made me choose geotechnical engineering. I started working for him for my undergraduate project at Bogazici University and worked for him at his geotechnical engineering company Zetas. He remains to be one of the best teachers and engineers I know. I am very fortunate to know him.

Turhan Karadayilar, Canan Emrem, Fatih Kulac and Selim Ikiz from Zetas have been great friends and mentors when I first started practicing geotechnical engineering. I have learned a lot working with them during my first years. Their help during my time at Zetas were very important to my professional development.

Ali Rana Atilgan, Kemal Hanoglu, Cuneyd Okay, Fuad Okay, Orkun Akkol and Burak Burc have been dear friends from my days at Bogazici University. Ozgur Cakir, Aziz Dursun and Onur Avci have been sincere friends during our stay in Blacksburg.

Several graduate students at Virginia Tech including Mike Navin, Randy Hickman, Andy Schwaiger, Diane and Chris Baxter, Carmine Polito, Wayne and Katherine Herring, Chris Meehan shared the journey. My officemate Brett Rose has patiently answered my questions on computers and statistics. Youngjin Park has helped me countless times with software and hardware problems. He is a real problem solver with his relaxed attitude and smiling face.

Russell Green has been great friend during his time at Virginia Tech. Our daily routine to eat at the Mexican or Subway remains to be missed. I enjoyed the mind stimulating conversations that stretched from earthquake engineering to politics.

It was a pleasure to arrange small scale reunions with my best friends from high school. Ozgur, Hakan and I met in 1983 and have been best friends since. Thanks to Ozgur Toros, Hakan Uluturk, Gozde Apakgun Uluturk, Halim Muslu and Jocelyne Kokaz for the extended weekends in Philadelphia and Washington DC.

I would especially like to thank my family: Mom, Dad and Sister for their continued moral support and my wife, Selen, who was always there for me with her love and continued support, and our little baby boy Deniz Guney for being healthy and cute.

to Selen and Deniz Guney
