

Acknowledgements

Support from several people has made the completion of this dissertation possible. My advisor, Professor Djavad Salehi-Isfahani, provided me with scholarly guidance and personal advice during all stages of this long endeavor. His confidence and keen interest in my work encouraged me to persevere. Professors Ann M. McGuirk, Russell D. Murphy, Aris Spanos, and Dennis T. Yang gave me important comments on the technicalities of this research and always made me aware of the need to broaden the horizons of my research. The Oficina Central de Estadística e Información allowed me access to much of the data used in this dissertation. My years at Virginia Tech were supported, in part, by the Economics Department. During these years, the emotional support of my father, Aristides Maza Tirado, my mother, Carmen Cecilia Duerto de Maza, as well as my brother, Aristides, sisters Orianna and Jenice, and my wife Angeliz, provided me the purest and most nurturing source of strength and happiness in this endeavor. I extend my deepest and most sincere gratitude to all of these guides and supporters.

Dedico este trabajo a mi abuelo, Jesús María Duerto, quien en vida fue ejemplo de honestidad, honradez, y dedicación. Tu corazón imbatible, tu alegría desbocada, tus poesías y cantos siempre los llevare conmigo. Gracias, Abuelo, por regalarnos tu cariño, atención y gentileza y gracias en nombre de toda nuestra familia por tantos momentos de alegría que tu, con tu carácter único, insistes realidad.

List of Tables	x
1. The Unexpected Stall and Reversal of the Fertility Decline and the Oil Induced Economic Shocks in Venezuela during the 1970s and 1980s.....	1
Introduction.....	1
1.1. The Venezuelan Demographic Transition: The Unexpected Stall and Reversal of the Fertility Decline	3
1.2. Oil Induced Economic Shocks of the 1970s and 1980s: Circumstantial Evidence of a Relationship with the Stall and Reversal of the Fertility Decline	10
1.3. Summary.....	17
2. Determinants of Total Fertility	19
Introduction.....	19
2.1. The Theory of Demand for Children	20
2.2. A Poisson Model of Total Fertility	22
2.3. Data and Variable Definitions	23
2.3.1. Place of Residence and Migratory Experience	25
2.3.2. Family Income	27
2.3.3. Work	28
2.3.4. Education	30
2.3.5. Age.....	33
2.4. The Poisson Regression Model and its Estimation.....	34
2.5. Results.....	35
2.6. Assessing the Fit.....	37
2.7. Interpreting the Results	38
2.8. Summary.....	41
3. Fertility Timing.....	43
Introduction.....	43
3.1. A Model of Fertility Timing	43
3.1.1. The Female Decision Problem.....	44

3.1.2. Solving the Model.....	46
3.2. Data and Methods.....	48
3.3. Childbearing Patterns.....	51
3.4. Socioeconomic and Demographic Factors Affecting Childbearing.....	57
3.4.1. Place of Residency.....	58
3.4.2. Age Effect.....	59
3.4.3. Educational Attainment.....	59
3.4.4. Female Labor Force Participation.....	60
3.5. Childbearing Pattern by Agricultural Intensity.....	61
3.6. Summary.....	64
Appendix.....	69
Works Cited.....	70
