

Vitae

The author, Mostafa Abdel-Aziz Elseifi, was born on November 11, 1974, in Cairo, Egypt to Abdel-Aziz Mohamed Elseifi and Aicha Karam Eldin Deff. Mostafa is the grandson of Karam Eldin Deff, a prestigious symbol for his city Mit Gamr in the north of Egypt. In 1988, he graduated from Ferdinand Buisson Preparatory School in Paris, France. He returned to Cairo in 1990 where he was admitted in the College of Engineering at Cairo University. In 1996, He obtained his Bachelor's Degree in Civil Engineering. He was awarded a distinction degree for his final project in Airport and Pavement Design. After his graduation, he worked as a laboratory engineer in the Pavement and Airport Laboratory at Cairo University. He then served in the Egyptian Army for 15 months in which he was responsible for the construction of an Olympic swimming pool in Cairo. After completion of his military service, he earned an appointment as teaching assistant in Misr International University in which he taught different classes including Mechanical and Chemical Properties of Materials. In 1997, he enrolled in the master program at Cairo University, in which he mainly focussed on building a strong theoretical background. After successfully completing his course work, he was ranked top of his class in the Structural and Construction Division. In December 1999, Mostafa earned his Master Degree from Virginia Tech. January 2000, Mostafa started working on his Ph.D. at Virginia Tech. He is currently working at Virginia Tech Transportation Institute.
