

***Piranha
By Mike***

Piranhas are very mean fish. They can eat a person in two or three minutes.

Piranhas have razor-sharp teeth and a strong lower jaw. That is why they eat so good. This is a picture of a animal that just got eaten by a piranha.

Piranhas are very aggressive little fish. Piranhas live in fresh and salt water. They live in South America and sometimes in North America but that is very rare not enelse someone owns a piranha which some people do. This is a picture of a piranha in a fish tank that a person owns. I think piranhas are cool looking.

THIS IS A
PICTURE OF
A RED
BELLIED
PIRANHA!!!!!!!
