

## LIST of TABLES

---

<u>Table</u>		<u>Page</u>
G.1	Experimental Shear Connection (Lauer et al. 1994) .....	8
H.1	Full-Scale Test Geometric Parameters .....	69
H.2	Full-Scale Test Results .....	69
H.3a	Steel Curve Stress Values .....	71
H.3b	Steel Curve Strain Values .....	71
H.4	Stress-Strain Curve for Screws .....	72
H.5	Strength and Ductility Calculations in Full-Scale Tests .....	90
H.6	Slip Capacity Reduction Factors .....	95
AH.1	Summary of Push-out Test Parameters and Results .....	103
I.1	Composite Beams with Formed Deck – Test Parameters .....	119
I.2	Composite Beams with Formed Deck –Results and Theoretical Values .....	121
I.3	Composite Beams with Solid Slabs .....	123
I.4	Statistical characteristics of shear connection .....	125
I.5	Summary of Statistical Characteristics of Beam Tests .....	125
I.6	Resistance Factor Calculations for $0 \leq \xi_1 \leq 1$ and $\xi_2 = 5.0$ .....	127
I.7	Typical $\phi$ for Composite Beams with P.N.A. in Flange and 1999 AISC .....	131
I.8	Typical $\phi$ with P.N.A. in Flange, Shear Conn. Govern. and RS-method Used .....	132
I.9	Typical $\phi$ for Solid Slab Beams, P.N.A. in Web, and Slab Strength Governing ....	134
I.10	$\phi$ for Solid Slab Beams, P.N.A. in Web, and Shear Connection Governing .....	136
I.11	Summary of Computed Average $\phi$ Values .....	136
