To: Matthew Bays &lt;mjb222@vt.edu&gt;

Matt,

Per the public release form you provided, the picture in question is covered by distribution statement A, which states that it is "Approved for Public Release; distribution is unlimited." Typically we keep the public release paperwork on file and mark the material with the above quote.

Also note that there are numerous other REMUS pictures in the public domain that you could use if it makes your life easier. I had a large number of relevant hits when I searched "REMUS 100 images". It's your call.

V/r,  
Dan
