

Dedication

This study is dedicated to my wife Karen, and my two sons, Brian and Jim. Their patience and support throughout my learning journey made me realize how lucky I am to live in their world.

Acknowledgements

This learning journey could not have been completed without the dedication and support of a wide range of friends and peers, all of whom became my “cheering section” during the completion of this study.

My committee chair, Dr. Bert Wiswell, provided a continuous level of support and coaching during my entire tenure at Virginia Tech. Without his dedicated guidance, I would never have been able to complete this study. Dr. Gerry Cline’s ability to be both a challenging mentor and a gifted statistician contributed immensely to my learning. The practitioner’s perspective provided by Dr. Letitia Combs helped to pull together the loose ends regarding my findings, and ensured I kept focused on what really adds value in this type of research. Dr. Norman Endlich gave willingly of his time and resources, and provided another practitioner’s perspective on my findings. Finally, I want to thank Dr. Tom Reio, who helped me start my journey, and who was always available when I needed him.

There also are those who were not members of my formal committee who became a critical part of my informal team. Dr. Gabriella Belli deserves my gratitude for her many hours of ad-hoc guidance on the inner workings of SPSS. To my mother-in-law, Dr. Sandra Spaulding, I want to give heartfelt appreciation for her many hours spent editing and working with me to craft a readable document. I would like to give a particular thanks to Dr. Ed Deitch, whose seminal guidance and informal coaching regarding the dissertation process kept me on track. Michele Eldridge and Nancy Van Buren, who I consider to be the unsung heroes of their respective departments, were always responsive to my needs. Without their help, I would not have been able to successfully maneuver through the administrative labyrinth of the dissertation process.

I wish to acknowledge the support of Dr. Phillip Mirvis, Dr. Paul Kohn and all the other experts who responded to my requests for time and attention. Their accessibility and responsiveness meant a great deal to me, and I appreciate their input and guidance. I also want to thank Irwin Golob, the HR leader at TRW who took the time and effort to help facilitate the data collection for this study. His support never wavered, and I consider him to be a world-class example of a true HR professional.

TABLE OF CONTENTS

CHAPTER I- OVERVIEW OF THE RESEARCH	Page
Introduction	1
Background	1
Statement of the Problem	2
Theoretical Underpinnings	4
Transformational Learning	4
McClusky's Theory of Power-Load- Margin	5
Antecedents to Commitment	6
Adaptiveness in Coping with Stress	7
Positive Affect	7
Area of Concern	8
Purpose of Study	8
Assumptions	8
Research Questions	8
Research Question 1	9
Research Question 2	9
Research Question 3	9
Research Question 4	10
Importance of Study	10
 CHAPTER II- LITERATURE REVIEW	
Background	12
The Nature of Mergers and Acquisitions	13
Definitions	13
Classifications of Merges and Acquisitions	14
Process	15
Impact of the Acquisition on Acquired Employees	17
Marriage	18
Personal Bereavement	18
Merger Syndrome	19
Separation Anxiety	19
Expectancy	19
Commitment	20
Defining Commitment	20
Allen & Meyer Three Component Model of Commitment	21
Antecedents to Allen & Meyer's Commitment Model	22
Price- Mueller Commitment Model	22
Familial Commitment	23
Section Summary	25
Adult Learning and Change	25
Transformational Learning	25
Theory of Margin	26
Dispositional Antecedents to Commitment	27
Adaptive Coping	27

Positive Affect	28
The Influence of the Employee’s Perception of Acquisition Success and Organizational Tenure/ Status on Post Acquisition Commitment	30
The Role of Organizational Culture	31
Summary	32
Background of the Northrop Grumman Acquisition of TRW	33
CHAPTER III- METHOD	
Conceptualization	35
Purpose of the Study	35
Sample	35
Instrumentation	36
Affective, Continuance and Normative Commitment	36
Positive Affect	37
Adaptive Coping	37
Employee Perception of Acquisition Success	38
Data Collection	38
Answering the Research Questions	39
Research Question 1	40
Research Question 2	40
Research Question 3	40
Research Question 4	41
Summary	41
CHAPTER IV- ANALYSIS	
Data Collection	42
Challenges to Data Collection	42
Changes to Survey	43
Analysis	43
Demographic Variables	43
Occupational Status	43
Years in the Work Force and Organizational Tenure	45
Dispositional and Commitment Scales	46
Positive Affect	46
Adaptive Coping	46
Positive Affect and Adaptive Coping	51
Employee Perception of Acquisition Success	52
Commitment Scales	54
Affective Commitment	54
Normative Commitment	55
Continuance Commitment	55
Answering the Research Question.....	56
Research Question #1	56
Repeated Measures	56
Hierarchical Regression	58

T ₁	58
T ₂	60
T ₃	61
Research Question #2	62
Research Question #3	64
Research Question #4	67
Full Model Regression	68
Discussion	68
Demographic Variables	68
Dispositional Attributes	68
Employee Perception of Acquisition Success	70
Commitment Scales	71
Summary	71

CHAPTER V- SUMMARY AND IMPLICATIONS

Introduction	72
Literature Review	72
Statement of Problem	75
Methods	75
Challenges to Data Collection	75
Summary of Data Analysis	76
Recommendations for Practice	77
Limitations	79
Recommendations for Future Research	80
Conclusion	81
