ACKNOWLEDGMENTS

The author would like to express her utmost appreciation to her advisor, Dr. Roe-Hoan Yoon, for his guidance, inspiration, confidence and support throughout the course of this study. Special thanks are delivered to Dr. Gerald H. Luttrell, Dr. Gregory T. Adel, Dr. Michael Karmis and Dr. Parthasarathy Venkatraman for their invaluable advice and continued assistance. Deepest appreciation also goes to Dr. Eric S. Yan for his invaluable advice, experimental assistance and expertise on engineering.

The author is also grateful for the financial support from the United States Department of Energy under grants No. DE-AC22-95PC95151.

Special gratitude is expressed to Wayne Slusser for his help and support. Special thanks are given to Neeraj Mendiratta, Zhuo Chen and all graduate students at Holden Hall and Plantation Road for their assistance, support, precious suggestions and friendship. Thanks are extended to Alisa Alls, Christine Watkinson for their assistance and support.

The author would like to express her utmost gratitude to the Thai Government who supported her financially throughout her study in the United States of America.

Finally, the author would like to express her deepest appreciation to her beloved parents, sisters and brother, for their love, continued encouragement and constant support, to my special friend, Somsak Narasingha, for his patience, constant encouragement, endless confidence and unconditional love.
