

Vita

Chun-Mei Zhao was born in Baotou, China. She earned her bachelor and master degrees in engineering at University of Science and Technology Beijing, Beijing, China. She came to the United States in 1997 and earned her Ph.D. at the Department of Educational Leadership and Policy Studies at Virginia Polytechnic Institute and State University in May, 2002. During her doctoral study, she also worked as a research assistant at the Academic Assessment Program at Virginia Tech.

Currently, she is working full-time as a research analyst with the National Survey of Student Engagement (NSSE) project at Center for Postsecondary Research and Planning at Indiana University-Bloomington. As a valuable member of the NSSE research team, she co-authored national reports as well as research papers and presented the results to regional and national higher education communities. Her research interests include institutional effectiveness and outcome assessment, institutional research, international students, women students in engineering fields and college impacts on students' personal and social development during their college careers.
