Dear Professor Greenside,

I'm a PhD student studying Engineering Mechanics at Virginia Tech. I'm writing my dissertation "topological chaos and chaotic mixing of viscous flows". (Just FYI, Dr. Mark Paul is one of my committee members.)

I was wondering if it's OK to use the 3-prong taffy puller picture of your website in my dissertation. I will of course mention your name and website as the source of the picture.

Regards,

Mohsen,

It is fine for you to use the picture, which is one that I took when visiting a taffy shop in Savannah, Georgia.

Your thesis sounds interesting.

Please give my warmest hello to Prof Paul!

Thanks,

Prof. Greenside

Prof. Greenside,

Thank you. The picture shows the stretching and folding of lines very nicely.

Regards,
