

# TABLE OF CONTENTS

LIST OF FIGURES .....	xiii
LIST OF TABLES .....	xix
1. INTRODUCTION .....	1
1.1 Introduction .....	1
1.2 Goals and Justification .....	3
1.3 Summary of Contents .....	4
2. LITERATURE REVIEW .....	7
2.1 Models for Semicrystalline Polymers .....	7
2.1.1 Fringed-Micelle Model .....	7
2.1.2 Chain-Folding Model .....	8
2.2 Morphology of Semicrystalline Polymers .....	12
2.3 Secondary Crystallization .....	14
2.4 Crystallization Behaviors of Homo- and Copolymers of Ethylene .....	15
2.5 Crystallization Theory of Homopolymers .....	18
2.5.1 Flory's Crystallization Theory for Homopolymers .....	18
2.5.2 The Kinetic Theory of Crystallization for Homopolymers .....	21
2.6 Copolymer Crystallization Theory .....	23
2.6.1 Flory's Theory of Copolymer Crystallization .....	25
2.6.2 Sanchez and Eby's Model for Copolymer Crystallization .....	29
2.6.3 Other Copolymer Crystallization Theories .....	32
2.7 Theoretical Considerations for Homo- and Copolymer Crystallizations .....	33
2.8 Nature of the Copolymers .....	37
2.8.1 Ziegler-Natta Based Copolymers .....	37
2.8.1.1 Linear Low Density Polyethylenes (LLDPE) .....	38
2.8.2 Metallocene Based Copolymers .....	39
2.8.2.1 Metallocene-Based Ethylene/ $\alpha$ -Olefin Copolymers .....	40
2.9 Literature Review .....	42

2.9.1	Comonomer Exclusion	42
2.9.2	Morphology	45
2.9.2.1	Dual Morphology - Lamellae and Bundles Crystals	45
2.9.2.2	Nature of Spherulites in Copolymers	50
2.9.3	Crystallization And Melting Behaviors Of Copolymers	52
2.9.3.1	Crystallinity	52
2.9.3.2	Melting Temperature	54
2.9.3.3	Crystal Parameters - Thickness and Surface Free Energy	56
2.9.3.4	Effect Of Molar Mass	58
2.10	Structure	59
2.10.1	Theory Of Infrared Spectroscopy	59
2.10.2	Infrared Spectrum Of Polyethylene	62
2.10.3	Influence Of Branches On The Infrared Spectra	65
2.10.4	Structure Of Polyethylene	66
2.10.5	Structure Of Copolymers Via WAXD	74
<b>3</b>	<b>EXPERIMENTAL</b>	<b>79</b>
3.1	Molecular Characteristics	79
3.2	<sup>13</sup> C NMR Spectroscopy	81
3.3	Differential Scanning Calorimetry (DSC)	82
3.3.1	Determination of Heat Capacities and Degrees of Crystallinity	83
3.3.2	Deconvolution of Low Endotherm Areas	87
3.3.3	Degree of Crystallinity	89
3.4	Fourier Transform Infrared Spectroscopy (FTIR)	91
3.5	Atomic Force Microscopy (AFM)	93
3.5.1	Experimental	93
3.5.2	Theory	93
<b>4</b>	<b>MATERIALS CHARACTERIZATION</b>	<b>97</b>
4.1	Characterization Using <sup>13</sup> C NMR	97
4.1.1	Peak Assignments	97

4.1.2	Branch Content Determination from Assigned Resonances .....	102
4.1.3	Microstructure Analysis .....	104
4.1.3.1	Ethylene/1-Butene Copolymers .....	104
4.1.3.2	Ethylene/1-Hexene Copolymers .....	109
4.2	Density Gradient Column Measurements .....	112
<b>5</b>	<b>DIFFERENTIAL SCANNING CALORIMETRY .....</b>	<b>118</b>
5.1	Introduction .....	118
5.2	Copolymer Sequence Distribution .....	119
5.3	Effect of Cooling Rate on the Crystallization Process.. ..	120
5.4	Melting Behavior Subsequent to Crystallization during Cooling at Constant Rate .....	131
5.5	Isothermal Crystallization At Room Temperature (~20°C) Subsequent to Quenching .....	133
5.5.1	Time Dependence of the Low Endotherm Location .....	137
5.5.2	Avrami Equation .....	145
5.5.2.1	Theory .....	145
5.5.2.2	Assumptions .....	148
5.5.3	Analysis of the Crystallization Time Dependence of the Low Endotherm Enthalpy .....	150
5.5.3.1	Avrami Exponents .....	150
5.5.3.2	Crystallization Rate Constants .....	153
5.6	Isothermal Crystallization at Higher Temperatures .....	155
5.6.1	Influence of Crystallization Temperature .....	155
5.6.2	Crystallization Time Dependence of the Endotherm Peak Location ...	156
5.6.3	Avrami-Type Analysis of the Heat of Fusion .....	156
5.6.4	Variation of Kinetic Parameters Above and Below T* .....	163
5.7	Discussion .....	167
5.7.1	Comonomer Exclusion .....	167
5.7.2	Dual Crystallization Mechanism .....	168
5.7.3	Cooling Rate-Dependent Hysteretic Region .....	171

5.7.4	Cooling Rate-Independent Reversible Region .....	172
5.7.5	Proposed Mechanism of Copolymer Crystallization .....	173
5.7.6	General Observations Based on the Model .....	175
5.7.7	Long-Time Dependence of the Low Endotherm .....	176
<b>6</b>	<b>ATOMIC FORCE MICROSCOPY .....</b>	<b>181</b>
6.1	Introduction .....	181
6.2	Results .....	182
6.2.1	Effect of Comonomer Content on Morphology .....	182
6.2.2	Dual Morphology .....	183
6.3	Discussion .....	193
6.3.1	Proposed Correlation between Comonomer Content and Morphology .....	193
6.3.2	Influence of Branch Concentration on Morphology .....	194
6.3.3	Influence of Cooling Rate .....	195
<b>7</b>	<b>FOURIER TRANSFORM INFRARED SPECTROSCOPY .....</b>	<b>199</b>
7.1	Infrared Spectroscopy Measurements .....	200
7.2	Analysis of Infrared Spectra - The Amorphous (Melt) Spectrum .....	201
7.2.1	Modeling the Melt Spectra .....	201
7.2.2	Determination of Amorphous Content.....	207
7.3	The Crystalline Spectrum.....	210
7.3.1	Degree of Crystallinity .....	210
7.3.2	Degree of Crystallinity - Effect of Comonomer Content .....	211
7.3.3	Modeling the Orthorhombic Doublet .....	217
7.4	Problems in Highly Branched Copolymers .....	217
7.5	Second Crystal Structure .....	218
7.6	Determination of the Second Crystal Structure .....	228
7.7	Discussion.....	233
7.7.1	Dual Crystal Structure .....	233
7.7.2	Effect of Cooling Rate .....	236
7.7.3	Effect of Comonomer Content .....	236

8 CONCLUSIONS .....	240
VITA .....	244
