

**The effect of spindle geometry on the establishment of merotelic kinetochore attachment and chromosome mis-segregation**

**William T. Silkworth**

Dissertation submitted to the faculty of the Virginia Polytechnic Institute and State University in partial fulfillment of the requirements for the degree of

Doctor of Philosophy  
In  
Biological Sciences

Daniela Cimini, chair  
Young Ju  
Jeffrey Kuhn  
Richard Walker

June 26<sup>th</sup> 2012  
Blacksburg, VA

Keywords: mitosis, aneuploidy, chromosome mis-segregation, merotelic kinetochore attachment, mitotic spindle geometry

## Chapter 2 copyright information:

The copyright statement below was taken verbatim from the publication:

### **3. Copyright and License Policies**

**Open access agreement.** Upon submission of an article, its authors are asked to indicate their agreement to abide by an open access Creative Commons license (CC-BY). Under the terms of this license, authors retain ownership of the copyright of their articles. However, the license permits any user to download, print out, extract, reuse, archive, and distribute the article, so long as appropriate credit is given to the authors and source of the work. The license ensures that the authors' article will be available as widely as possible and that the article can be included in any scientific archive.

**Open access agreement: US government authors.** Papers authored by one or more US government employees are not copyrighted, but are licensed under a Creative Commons public domain license (CC0), which allows unlimited distribution and reuse of the article for any lawful purpose. Authors should read about CC-BY or CC0 before submitting papers.

**Archiving in PubMed Central.** Upon publication, PLoS also deposits all articles in PubMed Central. This complies with the policies of funding agencies, such as the NIH in the USA, the Wellcome Trust, and the Research Councils in the UK, and the Deutsche Forschungsgemeinschaft in Germany, which request or require deposition of the published articles that they fund into publicly available databases.

### ***License and Publishing Agreement***

Authors are required to sign a License and Publishing Agreement when a manuscript is accepted for publication. Under this agreement, the authors grant to ASCB a perpetual, irrevocable, paid-up, worldwide license with the right to publish, distribute, reproduce, display, translate, sublicense for commercial purposes, and store the manuscript in all forms now known or hereafter devised and to authorize others to do so. Such license shall be exclusive until the effective date of the licensing of rights to the public as described below.

Authors retain the copyright and the right to reprint the manuscript in any publication of which authors serve as an author or editor, subject to proper citation of the manuscript in *MBoC* and where feasible the presence of a link to the original publication of the manuscript in *MBoC*. Also, authors are permitted to post the *MBoC* PDF of their articles (and/or supplemental material) on their personal websites or in an online institutional repository provided there appears always the proper citation of the manuscript in *MBoC* and a link to the original publication of the manuscript in *MBoC*. (Authors agree not to post the unedited accepted manuscript as it appears in *MBoC In Press*.) Authors further retain the right to revise, adapt, prepare derivative works, present, or distribute the manuscript provided that all such distribution is for noncommercial benefit and there appears always the proper citation of the manuscript in *MBoC* and where feasible a link to the original publication of the manuscript in *MBoC*.

Under the License and Publishing Agreement, authors grant to the general public, effective two months after publication of (i.e., the appearance of) the edited manuscript in an online issue of

*MBoC*, the nonexclusive right to copy, distribute, or display the manuscript subject to the terms of the Creative Commons–Noncommercial–Share Alike 3.0 Unported license (<http://creativecommons.org/licenses/by-nc-sa/3.0>).
