Subject: Re: Can I have the permission to use three figures in book "MARINE COMPOSITES"...

Zhenyu:

That is certainly fine with me as I'm sure you will reference the source.

Subject: Can I have the permission to use three figures in book "MARINE COMPOSITES" for the introduction part of my dissertation?

Hi, Mr. Greene,

I am a graduate student from Department of Engineering Science and Mechanics of Virginia Tech. I am writing my PhD dissertation and my research area is thermo-mechanical behavior of composites in fire. I looked at your book "MARINE COMPOSITES" and found it is very useful to give me a big picture of composites.

I am wondering if I can have your permission to use three figures in print and in electronic format for the introduction and background section of my dissertation. These figures are in the section "Naval Applications and Research & Development" of your book. They are Figure 1-33 "Lay-up Configuration for AMT Validation Model [Nguyen, 93 Sml Boat]", Figure 1-34 "Profile of AMT Validation Model [Nguyen, 93 Sml Boat]", and Figure 1-39 "French LA FAYETTE Class Frigate Showing Area Built with Balsa-Cored Composites [DCN Lorient, France]".

I really appreciate it if you allow me to use them in my dissertation.

Thank you.

Zhenyu

Zhenyu

Permission granted for the use of the figure. Good luck with writing of the thesis.

Regards
Adrian

Hi, Dr. Mouritz,

I am writing my PhD dissertation and I am wondering if I can have your permission to use Fig. 1 (as attached) in your review paper "Review of fire structural modelling of polymer composites" in print and in electronic format for the introduction and background section of my dissertation. I would reference the paper in my dissertation if I can use it. I really appreciate it if you can give me the permission.

Thank you.
