

# Acknowledgment

First and foremost I would like to express my profound gratitude to my advisor Dr. VanLandingham for his support, and encouragement throughout my Ph.D. research. I was happy to work under his supervision, and have greatly benefited from his advice and continuous understanding.

Special appreciation is given to my committee members Dr. W. Baumann, Dr. A. Elshabini, Dr. P. Kachroo, and Dr. C. Reinholtz for their time, and constructive comments towards my dissertation.

I cannot express my feelings of gratitude towards my parents who have done every effort and support to enable me to reach where I stand right now. Also, I would like to thank, and share this great achievement with my dear wife for her sacrifice, support, and understanding. I would like to dedicate this dissertation to my parents, wife, and lovely kids. Words alone can never completely express my gratitude.
