Vita

Qiang Lu was born on December 19, 1968 in Beijing, the capital city of People's Republic of China. He graduated from the High School of Tsinghua University, in Beijing. In the fall of 1987, he attended Electronics Engineering Department, Tsinghua University, in Beijing — the most prestigious university in China. After three years of study, he transferred his studies to Virginia Polytechnic Institute and State University, Blacksburg, Virginia. He received his BS degree from the Electrical Engineering Department in May 1992. Then he continued his studies in the master program, and received his MS degree in Electrical Engineering in May 1998. He started his Ph.D. program in January 1994, and accomplished most of his research work by the end of 1997.

In May 1997, he received *1997 Hardwood Research Award* from National Hardwood and Lumber Research Association for his excellent research work in the hardwood industry. In June 1998, as one of the inventors, he was awarded with US Patent 5,761,070 title *Automatic Color and Grain Sorting of Materials*.

During his studies at Virginia Tech, he was a research project assistant at both the Spatial Data Analysis Laboratory and the Virginia Tech Information System Center. He was also a graduate teaching assistant at the Bradley Department of Electrical and Computer Engineering.
