

List of Tables

Table 3.1. List of materials	37
Table 3.2. Displacement channels and locations	52
Table 3.3. Assembly 1 testing protocol	64
Table 3.4. Assembly 2 testing protocol	65
Table 3.5. Assembly 3 testing protocol	66
Table 3.6. Assembly 4 testing protocol	67
Table 3.7. Assembly 5 testing protocol	68
Table 4.1. Monotonic failure test data	99
Table 4.2. Assembly 2 cyclic test parameters.....	113
Table 4.3. SIP screw conditions.....	121
Table 4.4. Fischer equation shear and flexural stiffness summary.....	125
Table 5.1. Combined stress index for analyzed frames under wind loads.....	130
Table 5.2. Combined stress index for analyzed frames under wind loads.....	134
Table 5.3. Combined stress index for analyzed frames under seismic loads	145
Table A.1. Loading cycle sequence of basic loading history.....	164
Table A.2. Loading cycle stiffness sequence with maximum displacement of 0.1 in. (2.5 mm).	166
Table A.3. Loading cycle stiffness sequence with maximum displacement of 0.25 in..... (6.4 mm).	168
Table A.4. Loading cycle failure sequence with reference displacement of 1.02 in. (26 mm).	170
Table C.1. Assembly 1 cyclic test parameters at maximum displacements.....	185
Table C.2. Assembly 2 cyclic test parameters at maximum displacements.....	190
Table C.3. Assembly 3 cyclic test parameters at maximum displacements.....	195
Table C.4. Assembly 4 cyclic test parameters at maximum displacements.....	200
Table C.5. Assembly 5 cyclic test parameters at maximum displacements.....	205
