

TABLE OF CONTENTS

Chapter 1: Introduction to Supramolecular Chemistry

1.1	General Overview	1
1.2	Self-Assembly in Nature	2
1.3	Self-Assembly in Synthetic Chemistry	6
1.3.1	Supramolecular organic chemistry	6
1.3.2	Supramolecular inorganic chemistry	13
1.3.3	Supramolecular polymer chemistry	17
1.4	Conclusions	27
1.5	Goals and Outline of This Thesis	28
1.6	References	28

Chapter 2: Crown Ethers

2.1	Introduction	34
2.2	Synthesis of the Crown Ethers	34
2.2.1	Nonfunctional crown ether	35
2.2.2	Monofunctional crown ethers	36
2.2.3	Difunctional crown ethers	41
2.3	Conclusions	42
2.4	Experimental	43
2.5	References	51

Chapter 3: The Construction of Novel 1:3 Supramolecular Complex Formed from a Homotritopic Molecule and DB24C8 as a Core Architecture for Self-Assembling Dendrimers

3.1	Introduction	55
3.2	Results and Discussion	58
3.2.1	Synthesis	58
3.2.2	Complexation studies in solution	58
3.3	Conclusions	69

3.4	Experimental	70
3.5	References	72

Chapter 4: The Synthesis of Self-Assembling Dendrimers

4.1	Introduction	74
4.2	Results and Discussion	75
4.2.1	Synthesis	75
4.2.2	Complexation studies in chloroform	78
4.2.3	Complexation studies in acetone	86
4.2.4	Mass spectrometry	92
4.3	Conclusion	96
4.4	Experimental	97
4.5	References	100

Chapter 5: Formation of Supramolecular Polymers from Homoditopic Molecules Containing Secondary Ammonium Ion and Crown Ether Moieties

5.1	Introduction	102
5.2	Results and Discussion	103
5.2.1	Synthesis	103
5.2.2	Complexation studies in solution	105
5.2.3	Characterization of linear arrays in the solid state	110
5.3	Conclusions	113
5.4	Experimental	113
5.5	References	116

Chapter 6: Stabilities of Cooperatively Formed Cyclic Pseudorotaxane Dimers

6.1	Introduction	118
6.2	Results and Discussion	119
6.2.1	Synthesis	119
6.2.2	Complexation studies in dilute solution	121
6.3	Conclusions	125

6.4	Experimental	126
6.5	References	129

Chapter 7: The Optimized Construction of Supramolecular Polymers from Homoditopic Molecules Containing Secondary Ammonium Ion and Crown Ether Moieties

7.1	Introduction	131
7.2	Results and Discussion	132
7.2.1	Synthesis	132
7.2.2	Complexation studies in solution	133
7.3	Conclusions	138
7.4	Experimental	138
7.5	References	140

Chapter 8: Supramolecular Assemblies Formed from a Heteroditopic Molecule Containing a Secondary Ammonium Ion and Crown Ether Moieties

8.1	Introduction	141
8.2	Results and Discussion	141
8.2.1	Synthesis	141
8.2.2	Complexation studies by ^1H NMR spectroscopy	145
8.2.3	Mass spectrometry	152
8.3	Conclusions	154
8.4	Experimental	154
8.5	References	155

Chapter 9: Non-Covalent Chemical Modification of Crown Ether Side-Chain Polymethacrylates with a Secondary Ammonium Ion: A New Family of Polypseudorotaxanes

9.1	Introduction	157
9.2	Results and Discussion	158
9.2.1	Synthesis	158

9.2.2	Complexation studies	161
9.2.3	Physical properties	170
9.3	Conclusions	172
9.4	Experimental	172
9.5	References	175

Chapter 10: Effect of Substituents on the Formation of Pseudorotaxanes from Dialkylammonium Ions and Dibenzo-24-crown-8

10.1	Introduction	178
10.2	Results and Discussion	178
10.2.1	Synthesis	178
10.2.2	Complexation studies in solution	181
10.2.3	X-ray crystallography	188
10.3	Conclusions	189
10.4	Experimental	189
10.5	References	192

Chapter 11: Self-Organization of a Heteroditopic Molecule to Linear Polymolecular Arrays in Solution

11.1	Introduction	193
11.2	Results and Discussion	193
11.2.1	Synthesis	193
11.2.2	Self-organization in solution	197
11.2.3	Characterization of linear arrays in the solid state	205
11.3	Conclusions	209
11.4	Experimental	209
11.5	References	211

Chapter 12: Mechanically Interlocked Structures by the Slippage Approach

12.1	Introduction	214
12.2	Results and Discussion	216

12.2.1	Inspiration	216
12.2.2	Synthesis	217
12.2.3	Slippage in solution	222
12.2.4	Slippage in the melt	226
12.3	Conclusions	227
12.4	Experimental	227
12.5	References	231

Chapter 13: Synthesis of Main-Chain Polymacrocycles as Precursors to Novel Polypseudorotaxanes

13.1	Introduction	232
13.2	Synthesis and Characterization	233
13.2.1	Poly(ester crown ether) (10)	233
13.2.2	Poly(urethane crown ether) (13)	236
13.3	Conclusions	237
13.4	Experimental	237
13.5	References	240

Chapter 14: Thesis Summary and Future Work 241

VITA	244
