

DURABILITY OF POLYMER MATRIX COMPOSITES FOR INFRASTRUCTURE: THE ROLE OF THE INTERPHASE

Kandathil Nikhil Eapen Verghese

Dissertation submitted to the Faculty of the
Virginia Polytechnic Institute and State University
In partial fulfillment of the requirements for the degree of

Doctor of Philosophy
in
Materials Engineering and Science (MESc)

John J. Lesko, Chair

Judy S. Riffle

Richey M. Davis

Kenneth L. Reifsnider

Thomas C. Ward

August, 1999

Blacksburg, Virginia

Keywords: Composites, Vinyl Ester, Carbon Fiber, Interphase, Resin Film Infusion Molding, Pultrusion, Mechanical Properties, Fatigue, Moisture Aging, Environmental Durability, Viscoelastic Cooperativity
