

Table of Contents

Chapter 1	1
Project Description	1
1.1 Introduction	1
1.2 Project Objectives	3
1.3 Scope and Limitation	4
1.4 Rational and Significane	4
1.5 Organization of the dissertation	5
Reference	7
Chapter 2	8
Geometric Modeling of wood transverse thermal conductivity	8
Summary	8
2.1 Introduction	9
2.2 Background	11
2.2.1 Wood anatomical strucutre	11
2.2.2 Thermal conductivity of wood	14
2.2.3 Theoretical modeling of thermal conductivity	21
2.3 Experimental research on wood anatomical structure	30
2.3.1 Material and Methods	30
2.3.1.1 Sample preparation	30
2.3.1.2 Anatomical structure observation	32
2.3.1 Results and Discussion	34
2.4 Analytical research on wood transverse thermal conductivity modeling	40
2.4.1 Model development	40
2.4.1.1 Geometric model for softwoods	40
2.4.1.2 Geometric model for hardwoods	44
2.4.2 Theoretical derivation of thermal conductivity	46
2.4.2.1 Derivation of thermal conductivity for softwood species	46
2.4.2.1.1 Thermal resistance model	46
2.4.2.1.2 Tangential thermal conductivity derivation	47
2.4.2.1.3 Radial thermal conductivity derivation	50
2.4.2.2 Derivation of thermal conductivity for hardwood species	53
2.4.2.2.1 Thermal resistance model	53
2.4.2.2.2 Tangential thermal conductivity derivation	54
2.4.2.2.3 Radial thermal conductivity derivation	56
2.4.3 Numerical results for the model estimation	57
2.4.3.1 Estimation results for southern yellow pine	59
2.4.3.2 Estimation results for Scots pine	66
2.4.3.2.1 Estimation from the model for Scots pine sample below FSP	66
2.4.3.2.2 Estimation from the model for Scots pine sample above FSP	70
2.4.3.3 Estimation results for the hardwood species --maple	76
2.4.3.4 Comparison and Conculsion	79
2.5 Model evaluation and validation	81
2.5.1 Materials and Methods	81
2.5.1.1 Sample preparation	81
2.5.1.2 Experimental procedures	85
2.5.2 Results and Discussions	88

2.5.2.1	Relations between latewood percentage and transverse thermal conductivities ...	90
2.5.2.2	Relations between temperature and wood transverse thermal conductivities	93
2.5.2.3	Comparison of radial and tangential thermal conductivity.....	95
2.5.3	Model discrepancy and uncertainty analysis	96
2.5.4	Sensitivity study for the thermal conductivity models	101
2.6	Conclusions	107
	References	110
Chapter 3	114
	Two-dimensional non-linear model of the anisotropic transient heat conduction in wood.....	114
	Summary	114
3.1	Introduction	115
3.2	Background	117
3.3	Model development	122
3.3.1	Model assumptions.....	122
3.3.2	Model set-up.....	123
3.3.2.1	Physical model.....	123
3.3.2.2	Mathematical model	124
3.3.2.3	Boundary and Initial conditions	127
3.3.2.3.1	Boundary conditions.....	127
3.3.2.3.2	Initial condition	129
3.3.3	Numerical analysis and solutions	129
3.3.3.1	Discretization for the internal equation	130
3.3.3.2	Discretization for the boundary conditions	133
3.3.3.3	Time discretization	136
3.3.3.4	Numerical solution	137
3.3.4	Results and Discussions	139
3.3.4.1	Simulation run	139
3.3.4.2	Heat transfer mechanism analysis	140
3.3.4.2.1	Time series analysis.....	144
3.3.4.2.2	Spatial analysis	149
3.4	Model evaluation and validation	154
3.4.1	Materials and Methods	154
3.4.1.1	Sample preparation.....	154
3.4.1.2	Experimental procedure.....	156
3.4.2	Results and Conclusions.....	158
3.4.2.1	Estimation of the practical thermal conductivities in the two transverse directions on wood blocks.....	158
3.4.2.2	Transient temperature from model predictions and testing results.....	160
3.4.3	Sensitivity study for the 2D heat conduction model.....	167
3.5	Conclusion.....	171
	References	173
Chapter 4	177
	Final conclusions and recommendations.....	177
4.1	Final conclusions.....	177
4.2	Recommendations	180
	Appendix A	181
	Appendix B.....	206
