5.5 Car Maneuvering 110
5.6 Platooning 117
5.7 Merging and Weaving 119
  5.7.1 Ideal Gap 121
  5.7.2 Delay-Oriented Approach 122
  5.7.3 Multiple Merge Approach 124
  5.7.4 Finite Capacity Queuing 125
  5.7.5 State Depending Queuing 128
5.8 Summary of Merging 129

6. THREE-DIMENSIONAL CONTROL MODEL 135
  6.1 Introduction 135
  6.2 Vertical Control Model 135
  6.3 Lateral Position Control 144
  6.4 Lateral Position Control on Horizontal Curve 146
  6.5 Longitudinal Control 150
  6.6 Three-Dimensional Control Model 152
  6.7 Longitudinal Control Model 156
    6.7.1 Car Maneuvering Control Model 156
    6.7.2 Spacing Dependent Control Model 159
    6.7.3 Magnetic Coupling Control Model 177
    6.7.4 Combinations of Longitudinal Control Models 177
  6.8 Vehicle Motion on Curve 183
  6.9 Integration of 3-D Models 190

7. SUMMARY AND DISCUSSION 193
  7.1 Search for Perspective 193
  7.2 Purpose, Premise and Approach 195
  7.3 Overcoming Congestion with AHS Maglev 198
  7.4 Preserving Stream Stability 200
  7.5 Recommendations for Further Studies 202
