

Deformations of Unsymmetric Composite Panels

Tomoya Thomas Ochinero

Dissertation submitted to the Faculty of the Virginia Polytechnic Institute and State
University in partial fulfillment of the requirements for the degree of

Doctor of Philosophy
in
Engineering Mechanics

Michael W. Hyer, Chair

Alfred C. Loos

Don H. Morris

Liviu Librescu

Yuriko Renardy

October 24, 2001

Blacksburg, Virginia

Keywords: composite materials, plates, shells, Rayleigh-Ritz technique, buckling, postbuckling,
warping, graphite, carbon, residual stress, geometrically nonlinear effects, imperfections
