

LIST OF FIGURES

Figure 1-1. The Productive Efficiency Problem during a Transient Period.....	5
Figure 1-2. The Network Technology Model vs. the System Dynamics Model.....	13
Figure 2-1. A Simplistic View of a Complex Problem.....	18
Figure 2-2. Model Classifications.....	21
Figure 2-3. System Dynamics Time-script Convention.....	27
Figure 2-4. The Hydraulic Metaphor.....	29
Figure 2-5. Calculations at Time K.....	30
Figure 2-6. Examples of Positive and Negative Linkages.....	31
Figure 2-7. Calculating Loop Polarity.....	32
Figure 2-8. How Variables Interact with Feedback Loops.....	33
Figure 2-9. Exponential Growth Structure and Behavior.....	34
Figure 2-10. Goal Seeking Structure and Behavior.....	35
Figure 2-11. Exponential Decay Structure.....	36
Figure 2-12. Oscillation Structure.....	37
Figure 2-13. S-Shaped Growth.....	37
Figure 2-14. S-Shaped Growth with Overshoot Structure and Behavior.....	38
Figure 2-15. S-Shaped Growth with Overshoot and Collapse Structure and Behavior.....	40
Figure 2-16. The Difference Between Traditional and Optimized SD.....	41
Figure 2-17. An Illustration of Hill-climbing Optimization.....	43
Figure 2-18. The Generic Hill-Climbing Optimization Structure.....	44
Figure 2-19. The Concept of Technical and Allocative Efficiency.....	51
Figure 2-20. The DDEA Basic Structure.....	54
Figure 3-1. The Productive Efficiency Problem during a Transient Period.....	56
Figure 3-2. Limit Cycle Oscillation with $\lambda \geq 1$	74
Figure 3-3. The Transient Options.....	79
Figure 3-4. A Two Dimensional, Static View of Efficiency.....	80
Figure 3-5. Isoquants Increase to the Northeast as Output Increases.....	81
Figure 3-6. Three-Dimensional View of Productivity with the Production Function.....	81
Figure 3-7. The Dynamic Efficiency Plane.....	82
Figure 3-8. The Generic Dynamic Productive Efficiency (Input-Decreasing) Model.....	85
Figure 3-9. Multiple Inputs and Multiple Outputs (Input-Decreasing) Model.....	91
Figure 3-10. The Generic Dynamic Productive Efficiency (Output-Increasing) Model.....	92
Figure 3-11(a). Capital Optimization Structure.....	100
Figure 3-11(b). Fuel Optimization Structure.....	101
Figure 3-11(c). Labor Optimization Structure.....	102
Figure 3-11(d). Technical Efficiency and Cost Calculation Structure.....	103
Figure 3-11(e). Allocative Efficiency Initial Conditions Calculation Structure.....	104

Figure 3-11(f). Allocative and Overall Productive Efficiency and Cost Calculation Structure.....	105
Figure 4-1. The Systems Life-cycle.....	110
Figure 4-2. The Improvement Spiral.....	111
Figure 4-3(a). Scenario 1 Base Case.....	127
Figure 4-3(b). Scenario 1 Excursion Case.....	128
Figure 4-3(c). Scenario 1 Employees Hill-Climbing Optimization Structure.....	133
Figure 4-3(d). Scenario 1 Workstations Hill-Climbing Optimization Structure....	134
Figure 4-3(e). Scenario 1 Contractors Hill-Climbing Optimization Structure.....	135
Figure 4-3(f). Scenario 1 Cost and Technical Efficiency Structure.....	136
Figure 4-4(a). Scenario 2 Special Data Structure.....	137
Figure 4-4(b). Scenario 2 Base Case Structure.....	138
Figure 4-4(c). Scenario 2 Excursion Case Structure.....	139
Figure 4-4(d). Scenario 2 Employees Hill-Climbing Optimization Structure.....	140
Figure 4-4(e). Scenario 2 Workstations Hill-Climbing Optimization Structure....	141
Figure 4-4(f). Scenario 2 Contractors Hill-Climbing Optimization Structure.....	142
Figure 4-4(g). Scenario 2 Cost and Technical Efficiency Structure.....	143
Figure 4-5(a). Scenario 3 Special Data Structure.....	144
Figure 4-5(b). Scenario 3 Base Case Structure.....	145
Figure 4-5(c). Scenario 3 Excursion Case Structure.....	146
Figure 4-5(d). Scenario 3 Employees Hill-Climbing Optimization Structure.....	147
Figure 4-5(e). Scenario 3 Workstations Hill-Climbing Optimization Structure....	148
Figure 4-5(f). Scenario 3 Cost and Technical Efficiency Structure.....	149
Figure 4-6(a). Scenario 4 Special Data Structure.....	150
Figure 4-6(b). Scenario 4 Base Case Structure.....	151
Figure 4-6(c). Scenario 4 Excursion Case Structure.....	152
Figure 4-6(d). Scenario 4 Employees Hill-Climbing Optimization Structure.....	153
Figure 4-6(e). Scenario 4 Workstations Hill-Climbing Optimization Structure....	154
Figure 4-6(f). Scenario 4 Contractors Hill-Climbing Optimization Structure.....	155
Figure 4-6(g). Scenario 4 Cost and Technical Efficiency Structure.....	156
Figure 4-7. Scenario 1 Production Resources.....	158
Figure 4-8. Scenario 1 Data Comparison.....	159
Figure 4-9. Scenario 1 Cost per Data Set and Data Differentials.....	159
Figure 4-10. Scenario 1 Improvement Potential Based on Technical Efficiency....	160
Figure 4-11. Scenario 1 Technology Spirals.....	162
Figure 4-12. Scenario 2 Production Resources.....	163
Figure 4-13. Scenario 2 Data Comparison.....	164
Figure 4-14. Scenario 2 Improvement Potential Based on Technical Efficiency....	164
Figure 4-15. Scenario 2 Cost per Data Set and Data Differentials.....	165
Figure 4-16. Scenario 2 Technology Spirals.....	165
Figure 4-17. Scenario 3 Production Resources.....	166
Figure 4-18. Scenario 3 Data Comparison.....	167
Figure 4-19. Scenario 3 Cost per Data Set and Data Differentials.....	168
Figure 4-20. Scenario 3 Improvement Potential Based on Technical Efficiency....	168

Figure 4-21. Scenario 3 Technology Spirals.....169

Figure 4-22. Scenario 4 Production Resources.....171

Figure 4-23. Scenario 4 Data Comparison.....171

Figure 4-24. Scenario 4 Cost per Data Set and Data Differentials.....172

Figure 4-25. Scenario 4 Improvement Potential Based on Technical Efficiency.....173

Figure 4-26. Scenario 4 Technology Spirals.....173

Figure 4-27. Unequal Adjustment Times for Interdependent Variables.....176

Figure 4-28. Dynamic Confidence Interval for Employees 1.....179

Figure 4-29. Dynamic Confidence Interval for Workstations 1.....179

Figure 4-30. Dynamic Confidence Interval for Contractors 1.....180

Figure 4-31. Dynamic Confidence Interval for Employees 2.....181

Figure 4-32. Dynamic Confidence Interval for Workstations 2.....181

Figure 4-33. Dynamic Confidence Interval for Contractors 2.....182

Figure 4-34. Dynamic Confidence Interval for Employees 3.....183

Figure 4-35. Dynamic Confidence Interval for Workstations 3.....183

Figure 4-36. Dynamic Confidence Interval for Employees 4.....186

Figure 4-37. Dynamic Confidence Interval for Workstations 4.....186

Figure 4-38. Dynamic Confidence Interval for Contractors 4.....187
