Abstract	ii
Acknowledgments	iii
Contents	iv
List of Figures	vii
List of Tables	xi
1-Introduction	1
1.1 Background	1
1.2 Purpose and Scope	4
2-High Pressure Behavior of Porous Geomaterials	8
2.1 Overview	8
2.2 High Pressure Test Equipment	9
2.2.1 Overview	9
2.2.2 100 MPa Static and Dynamic Test Devices	9
2.2.3 600 MPa Static Shear Test Device	12
2.2.4 1 GPa Static and Dynamic Test Device and Loader	12
2.3 Material Property Research Prior to 1959	13
2.4 Material Property Research from 1960 to 1969	15
2.5 Material Property Research from 1970 to Present	33
2.6 Summary	46
3-Finite Element Model	103
3.1 Introduction	103
3.2 Effective Stress Mechanics	103

3.3	Background	105
3.4	Finite Element Formulation	107
3.4.1	Effective stresses and strains	107
3.4.2	Finite element equations	109
3.5	Constitutive Models	113
3.6	Introduction: Equations of State for Air, Water, and Solids	113
3.7	Equation of State for Water	114
3.8	Air-Water Compressibility	115
3.8.1	Background	115
3.8.2	Boyle's and Henry's laws	117
3.8.3	Derivation of equations	118
3.9	Equation of State for Solids	120
3.10	Element Implemented into JAM	122
3.11	Summary	122
4-	The Cap Model and Its Implementation	128
4.1	Introduction	128
4.2	Background	129
4.3	Loading Functions and Flow Rule	130
4.4	Derivation of Incremental Elastic-Plastic Stress-Strain Relations	133
4.5	Elastic-Plastic Constitutive Matrix	136
4.6	Plastic Hardening Modulus	138
4.7	Cap Model Implemented into JAM	139
4.8	Implementation of Cap Model into JAM	144
4.9	Verification	145
4.10	Summary	147
5-	Features and Verification of FE Program	156
5.1	Introduction	156
5.2	Additional Features of FE Program	157
5.2.1	Restart feature	157
5.2.2	Postprocessing	157
5.3	Verification Problems	158
5.4	Consolidation Problems	159
5.5	Cryer Problem	160
5.6	Summary	161
6-	Numerical Simulations	171
6.1	Introduction	171
6.2	Salem Limestone	171

6.3 Simulations	172
6.3.1 Process	172
6.3.2 Drained limestone simulations	172
6.3.3 Undrained limestone simulations	173
6.3.4 Partially-saturated undrained limestone simulations	175
6.4 Test Specimen Simulations	181
6.4.1 FE grid	181
6.4.2 Simulation of drained triaxial compression test	182
6.4.3 Simulation of consolidated undrained triaxial compression test	183
6.5 Summary	184
7-Summary and Conclusions	227
7.1 Summary	227
7.2 Conclusions	230
References	232
Appendix A: Corrected Equations	241
Appendix B: Equations for Residual Forces	245
Appendix C: Derivation of Equations for an Air-Water Mixture	250
Appendix D: The Proportionality Factor	256
Appendix E: Numerical Implementation of the Cap Model	259
E.1 Introduction	259
E.2 Elastic algorithm	260
E.3 Failure envelope algorithm	261
E.4 Cap algorithm	267
E.5 Tensile algorithm	270
Appendix F: Verification Problems	272
