

**THE DEVELOPMENT OF A NEW CLONING STRATEGY  
FOR THE BIOSYNTHETIC PRODUCTION OF  
BRUSH-FORMING POLY(AMINO ACIDS)**

Douglas B. Henderson

Dissertation submitted to the Faculty of the Virginia Polytechnic Institute and State  
University in partial fulfillment of the requirements for the degree of  
Doctor of Philosophy  
in  
Chemical Engineering

Dr. Richey M. Davis, Committee Chair

Dr. Kevin E. Van Cott

Dr. William A. Ducker

Dr. Kim Forsten Williams

Dr. Aaron S. Goldstein

December 10, 2004  
Blacksburg, Virginia

KEYWORDS: poly(amino acids), biopolymer, recombinant DNA , self-assembly, brush
