

**Effects of Long-chain Surfactants, Short-chain Alcohols and
Hydrolizable Cations on the Hydrophobic and Hydration Forces**

Vivek Subramanian

Dissertation submitted to the Faculty of the
Virginia Polytechnic Institute and State University
in partial fulfillment of the requirement for the degree of

Doctor of Philosophy
in
Materials Engineering Science

Roe-Hoan Yoon, Chair
Gerald H. Luttrell
William A. Ducker
Richey M. Davis
S. A. Ravishankar

December 2, 1998
Blacksburg, Virginia

Keywords: Hydrophobic and Hydration Forces, Silica, Mica, Surfactants, Alcohol,
Hydrolizable Cations
