

## ACKNOWLEDGMENTS

This research was made possible through a research planning grant awarded to Dr. Kim Forsten by the National Science Foundation.

Many thanks to my advisor, Dr. Kim Forsten, who has been actively involved with all areas of my research from day one. I have learned much from her tutelage and am fortunate to have had such a dedicated advisor.

A world of thanks to my family. Mom and Dad, you are the best parents anyone could ever wish for. Jeff, your patience and help with all my computer problems saved me from two years of migraines. Aaron, you have been there for me through good and bad, and amazingly are still willing to be. And last, but definitely not least, I could not have survived graduate school without my ever-faithful dog, Wickett.
