

Acknowledgments

First and foremost, I would like to express my appreciation to Dr. Joe Falkinham for allowing me to pursue my doctoral degree in his laboratory. Through Joe I have learned much about research, experimental design, and critical thinking. He will always be important to me as a mentor, colleague, and friend.

I would also like to thank several faculty members for their influence on my graduate career. Many thanks go to Dr. Brenda Shirley for her frequent advice and encouragement. Her performance as a teacher and researcher is one I can only hope to one day emulate. Thanks also go to Dr. Muriel Lederman for her candid advice, and to Dr. Joe Cowles for his consummate diplomacy.

I'm also very appreciative of the friends I have made in graduate school, including Lori Brookman, Cody Cain, John Mayo, Jamie Stanek, Laura Via, Mary Alice Woodburn, Twilla Eaton Zirkle, and Ross Zirkle. Their support and high-jinx made graduate school a fun experience. I'll always have fond memories of lunch time conversations, coffee breaks, and scientific meetings.

I'd like to give special thanks to my parents, Don and Edith Jensen, for their unwavering love and support. Particular thanks to my mom, for teaching me patience and perseverance, and to my dad, for instilling in me as a child the belief that I could accomplish anything I set my mind to.

Finally, and most importantly, I wish to express my love, appreciation, and gratitude to my husband and colleague, Cody Cain, for his love, encouragement, and friendship. Words cannot express my thankfulness for his loving support during my graduate tenure.

Table of Contents

Title Page.....	i
Abstract.....	ii
Acknowledgments.....	iii
Table of Contents.....	iv
List of Figures.....	vi
List of Tables.....	viii

Chapter 1

Introduction.....	1
Epidemiology of <i>Mycobacterium avium</i>	2
Polyclonal <i>M. avium</i> infections.....	2
Antibiotic therapy for <i>M. avium</i> disease.....	2
Macrolide antibiotics.....	3
Mechanisms of macrolide resistance in bacteria.....	3
Macrolide resistance in <i>M. avium</i>	6
Specific objectives.....	8

Chapter 2

Origin of macrolide-resistant isolates of <i>Mycobacterium avium</i> in patients undergoing therapy.....	9
Introduction.....	11
Materials and methods.....	13
Results and Discussion.....	16

Chapter 3

Identification of mutations in the 23S rRNA gene associated with macrolide resistance in <i>Mycobacterium avium</i> , and detection of macrolide-resistant <i>M. avium</i> isolates using PCR.....	26
Introduction.....	28
Materials and methods.....	30
Results and Discussion.....	33

Chapter 4

Development and use of an <i>in vitro</i> translation system of characterizing macrolide resistance in <i>Mycobacterium avium</i>	39
--	----

Introduction.....	41
Materials and methods.....	42
Results and discussion.....	44
<u>Chapter 5</u>	
Characterization of <i>Mycobacterium avium</i> isolates exhibiting intermediate resistance to azithromycin.....	53
Introduction.....	55
Materials and methods.....	56
Results and discussion.....	58
<u>Appendix A</u>	
Cloning and isolation of ribosomal proteins from <i>Mycobacterium</i> species.	65
Introduction.....	67
Materials and methods.....	68
Results and discussion.....	73
Literature Cited.....	79
Curriculum vitae.....	87

List of Figures

Chapter 1

- Figure 1.1.** Structure of clarithromycin..... 4
Figure 1.2. Structure of azithromycin..... 5

Chapter 2

- Figure 2.1.** *M. avium* RAPD profiles generated with primer OPA-13.... 18
Figure 2.2. *M. avium* RAPD profiles generated with primer OPB-07.... 19
Figure 2.3. *M. avium* RAPD profiles generated with primer OPI-20..... 20
Figure 2.4. Southern blot analysis of *M. avium* RAPD profiles..... 21
Figure 2.5. Southern blot of *M. avium* genomic DNA digested with
EcoRI and hybridized with IS1245 probe..... 22
Figure 2.6. Southern blot of *M. avium* genomic DNA digested with
SalI and hybridized with IS1245 probe..... 23

Chapter 3

- Figure 3.1.** PCR detection of point mutations..... 29
Figure 3.2. Sequence of peptidyl transfer region of 23S rRNA..... 35
Figure 3.3. Optimization of annealing temperature for PCR detection
of mutations leading to clarithromycin resistance..... 36
Figure 3.4. PCR detection of clarithromycin resistance in clinical *M. avium*
strains using primers CLA-R and FG2..... 37
Figure 3.5. Specificity of primer-template mismatches in preventing
PCR amplification..... 38

Chapter 4

- Figure 4.1.** Kinetics of incorporation of [¹⁴C]-phenylalanine
into protein..... 46
Figure 4.2. Incorporation of [¹⁴C]-phenylalanine relative to
tRNA concentration..... 47

Figure 4.3. Effect of azithromycin and clarithromycin on [¹⁴ C]-phenylalanine incorporation in <i>M. avium</i> strains.....	48
Figure 4.4. Effect of clarithromycin on [¹⁴ C]-phenylalanine incorporation in clarithromycin-sensitive and -resistant <i>M. avium</i> strains..	49
Figure 4.5. Effect of clarithromycin on [¹⁴ C]-phenylalanine incorporation in equal mixtures of <i>M. avium</i> strains 201-1 and 201-2.....	50
Figure 4.6. Effect of azithromycin on [¹⁴ C]-phenylalanine incorporation in <i>M. avium</i> strains exhibiting intermediate azithromycin resistance.....	51

Chapter 5

Figure 5.1. Hydrophobicity of <i>M. avium</i> strains.....	63
---	----

Appendix A

Figure A.1. Conserved regions in amino acid sequences of L4 proteins..	69
Figure A.2. Conserved regions in amino acid sequences of L22 proteins	70
Figure A.3. DNA sequence of ML22.....	74
Figure A.4. Comparison of the ML22 deduced amino acid sequence with amino acid sequences from L22 proteins in bacteria.....	75
Figure A.5. Comparison of hydrophilicity plots of ML22 and known L22 ribosomal proteins.....	76
Figure A.6. Absorbance at 260 nm of fractions collected following sucrose-density gradient centrifugation.....	77
Figure A.7. Northern dot blot analysis of fractions collected following sucrose-density gradient centrifugation.....	78

List of Tables

Chapter 2

Table 2.1.	Sequences of oligonucleotide primers.....	15
Table 2.2.	Minimal inhibitory concentrations (MICs) of azithromycin and/or clarithromycin for <i>M. avium</i> isolates.....	17
Table 2.3.	RAPD and RFLP analysis of macrolide-sensitive and subsequent macrolide-resistant <i>M. avium</i> isolates.....	24

Chapter 3

Table 3.1.	Sequences of oligonucleotide primers.....	31
Table 3.2.	<i>M. avium</i> strains used in this study.....	34

Chapter 4

Table 4.1.	Determination of optimal lysis conditions for preparation of S-20 extract.....	45
-------------------	--	----

Chapter 5

Table 5.1.	Inactivation of azithromycin by <i>M. avium</i> strains.....	59
Table 5.2.	Temperature sensitivity and growth requirements of <i>M. avium</i> strains.....	60
Table 5.3.	Minimal inhibitory concentrations (MICs) of <i>M. avium</i> isolates.....	61
Table 5.4.	Effect of CCCP on MICs of <i>M. avium</i> isolates.....	62

Appendix A

Table A.1.	Sequences of oligonucleotide primers.....	71
-------------------	---	----
