Integrated Multidisciplinary Design Optimization Using Discrete Sensitivity Analysis for Geometrically Complex Aeroelastic Configurations

James C. Newman, III

Dissertation submitted to the Faculty of the
Virginia Polytechnic Institute and State University
in partial fulfillment of the requirements for the degree of

Doctor of Philosophy
in
Mechanical Engineering

Richard W. Barnwell, Chair
Arthur C. Taylor, III
Wing F. Ng
Elaine P. Scott
Robert L. West

July 22, 1997
Blacksburg, Virginia

Keywords: Static Aeroelastic Analysis, Unstructured Grids, Aerodynamic Shape Optimization
