Vita

Sergio Preidikman was born on August 2, 1963, at Coronel M6ldes, C6rdoba, Argentina where he completed his elementary, middle, and high school. In 1981, he entered the National University of C6rdoba and graduated in 1988 with a Bachelor of Science degree in Aeronautical and Mechanical Engineering. While at the National University of C6rdoba, he worked as a designer and computer programmer in industry. Upon graduation, he worked as a researcher at the National Council of Technical and Scientific Investigations of Argentina, as a teacher at the National University of C6rdoba and at the National Technological University, and as an engineer in industry. In the spring of 1991, he began graduate school in the Civil Engineering Department at the University of Puerto Rico at Mayagüez, where he completed the requirements for the degree of M.S. in Civil Engineering in May 1992. After graduation, he worked as a teacher in the same department. In August 1994, the author started his Ph.D. program in the Department of Engineering Science and Mechanics at the Virginia Polytechnic Institute and State University. The author completed all the requirements for his Ph.D. in Engineering Mechanics in October 1998. The author, his wife Sandra, and their two children Julia and David currently live in R6o Cuarto, Argentina.
