V I T A

Budi R. Widjaja was born on May 9, 1961 in Semarang, Indonesia. He obtained his B. S. degree in civil engineering from Parahyangan Catholic University in Bandung, Indonesia, in April 1985. After a year working in a contracting company, he joined with Parahyangan Catholic University as a part time teaching assistant. Simultaneously he worked as a structural engineer in a consulting firm in Bandung, Indonesia, until Fall of 1990, at which time he entered the graduate program in civil engineering at Virginia Polytechnic Institute and State University. He completed his Master of Science degree in May 1993 and continued pursuing a Ph.D. degree in civil engineering. He worked as a research assistant at the Structures and Materials Laboratory during his doctoral study.
