Abstract ............................................................................................................. i
Table of Contents ............................................................................................ v
List of Figures ................................................................................................... x
List of Tables ..................................................................................................... xi

Chapter 1 Introduction and the Problem ......................................................... 1
Introduction ....................................................................................................... 1
Significance of the Study ................................................................................. 9
Statement of the Problem .............................................................................. 10
Delimitation ..................................................................................................... 13
Assumptions ..................................................................................................... 13
Operational Definitions .................................................................................. 14

Chapter 2 A Review of Literature Related to Construction as an Organizer for Technology Education .......................................................... 16
The Importance of Construction ................................................................. 16
Technology, Technological Literacy, and Construction ......................... 20
Defining Technology ...................................................................................... 20
Technology - An Operational Definition .................................................. 30
A Review of Selected Definitions of Literacy .......................................... 32
An Operational Definition of Literacy ....................................................... 35
Technological Literacy .................................................................................. 35
Considerations Related to Writing a Definition .................................... 38
An Operational Definition of Technological Literacy ......................... 49
Differences in the Surveys Sent to Construction Specialists Versus Non-Construction Specialists .......................... 93
Section 7 of the Instrument ........................................ 93
Section 8 of the Instrument ........................................ 94
Section 9 of the Instrument ........................................ 94
Section 10 of the Instrument ....................................... 94
Section 11 of the Instrument ....................................... 95
The Pilot Study ......................................................... 95
Pilot Study Response .................................................. 96
Pilot Study Data Entry ............................................... 97
Pilot Study Summary .................................................. 97
Overall Response Rate ............................................... 98
Follow-up on Non Respondents .................................... 99
Software Used in the Data Analysis ................................. 99
Medoid Cluster Analysis ............................................. 100
Creating Dummy Variables to Represent Respondent Assignment to a Cluster ........................................... 102
Discriminant Analysis ............................................... 102
Interpreting the Variable Influence Report ....................... 103
Interpreting the Canonical Variate Analysis Report .......... 105
Calculating the Relative Importance of Construction ....... 106
Testing for Differences Between the Clusters with Respect to the Relative Importance of Construction ...... 107
