

# **Developmental Outlines for a Desktop-based Online Tool for Collaborative Processes**

By

**Rupashree Majali**

Thesis submitted to the faculty of the  
College Of Architecture and Urban Studies  
Virginia Polytechnic Institute and State University  
In partial completion of the requirements leading to the degree of

**MASTER OF SCIENCE**

in

**Architecture**

(Design, Computing and Representation Concentration)

Prof. Dennis B. Jones

Dr. Robert P. Schubert

Dr. John W. Dickey

May 10, 2000  
Blacksburg, Virginia

**Keywords: Desktop conferencing, Group problem solving, groupware, online  
collaboration**

## GRATITUDES

---

I would like to thank the following people, each of whom in their own way, contributed to this research and dissertation.

Dennis Jones, my advisor, for his patience and motivation and for always being there to answer my incessant questioning and his complete belief in my abilities. He was the person that set me off on the information technology path.

Dr. John Dickey, without whom there would have been no such research, for he was the person that originally posed the challenge to me.

Dean of Research, Robert Schubert for repeatedly 'rescuing' me financially by funding my research every semester!

My parents Mythili and Ashok Majali, whose presence, encouragement and inspiration did not seem to fade away, even with 10,000 miles separating us! I thank them for their constant, undying faith in me and for supporting my decision to 'go back to school'.

Lastly and most importantly, I would like to thank my dear husband – James without whose love, confidence and understanding I might not have achieved much. I also thank him for his help and deep, deep knowledge of MSWord, which made possible this dissertation in spite of MSWord!

# CONTENTS

<b>Research Abstract</b>	<b>.....1</b>
<b>Research Overview</b>	<b>. ....2</b>
<b>Computer-based Conferencing and Collaboration Systems and the Future of Desktop Conferencing</b>	
▪ What is the Aim of this Research?	.....2
▪ Background	.....3
▪ Why Conference on the Web?	.....6
▪ Issues and Challenges	.....7
<b>Chapter 1</b>	<b>.....8</b>
<b>A Brief Description of CyberQuest</b>	
1.1 What is CyberQuest	.....8
1.1.1 Stages Involved in the Idea Generation Process	.....9
1.2 Current Limitations of CyberQuest (CQ)	.....10
<b>Chapter 2</b>	<b>.....12</b>
<b>Brief Description of Steps Involved in converting CQ to be a Web-Based Application</b>	
2.1 Process of conversion of CQ to a Web-based application	.....12
2.2 The Basics of Web File Processing	.....13
2.2.1 How Web File Processing Works	.....13
2.2.2 Web Server Connections	.....14
2.2.3 Run-Time Interaction of Components	.....14
<b>Chapter 3</b>	<b>.....16</b>
<b>The Basics of the Internet and the World Wide Web</b>	
3.1 Brief History of the Internet and World Wide Web	.....16
3.2 Internet Versus Intranets	.....18
3.3 Hypertext Markup Language	.....20
3.4 Browsers	.....20
3.5 What happens to HTML pages?	.....20
3.6 Hyper Text Transfer Protocol (HTTP)	.....21
3.7 Client – Server Architecture and the New Dynamic Web	.....22
3.7.1 Separating the Tasks	.....23
3.7.2 Web Client/Server Architectures	.....23
3.8 Summary	.....24
<b>Chapter 4</b>	<b>.....25</b>
<b>Detailed Description of Conversion Issues</b>	
4.1 Scripting Languages	.....25
4.1.1 Where Java Fits In?	.....26

4.1.2	Client-Side and Server-Side Scripts	.....27
<b>4.1</b>	4.1.3 Choosing a Scripting Language	.....28
<b>4.2</b>	Shortcomings of HTML in the Context of a Web-based CQ	.....29
4.2.1	What Scripts Can Do that HTML Cannot?	.....30
<b>4.3</b>	The Web Application	.....30
<b>4.4</b>	The Web Server	.....32
<b>4.5</b>	Databases and the Web	.....32
4.5.1	Why is Database Connectivity Important in the Context of WebCQ?	.....32

## **Chapter 5** .....33

### **Translating a Visual Basic Application For The Web**

	Introduction	.....33
<b>5.1</b>	Replacing Visual Basic Elements	.....34
5.1.1	Replacing Visual Basic Forms	.....34
5.1.2	Replacing Visual Basic Controls	.....35
5.1.3	Replacing Event Handlers, Procedures and Functions	.....35
5.1.4	The Back End	.....36
<b>5.2</b>	Introduction To ActiveX Technology	.....36
<b>5.3</b>	Using VBScript with ActiveX Controls and Containers	.....38

## **Chapter 6** .....44

### **Exploring CQ Desktop Inter-Connectivity Using Application Sharing Software**

<b>6.1</b>	Over view of Lotus-DataBeam Corp.'s Sametime™	.....44
<b>6.2</b>	Over view of Microsoft NetMeeting 2000™	.....45
6.2.1	Useful Features of NetMeeting™ pertaining to CQ sharing	.....45
6.2.2	System Specifications	.....46
<b>6.3</b>	Over view of Centra Symposium™	.....47
6.3.1	Three-Tier Distributed Architecture of Centra Symposium	.....48
6.3.2	System Specifications	.....50
<b>6.4</b>	How Microsoft's NetMeeting Compares with Centra Symposium	.....51
<b>6.5</b>	How Application Sharing compares with a Web-enabled CQ	.....52

## **Chapter 7** .....53

### **Findings and Future Direction**

<b>7.1</b>	Where to From Here?	.....53
<b>7.2</b>	Future Direction	.....55

**Appendix A** .....I

**Appendix B** ....IV

**List of Illustrations**

Fig A	Worldwide Market for Online Conferencing Products	.....5
