APPENDICES

Appendix A.

Figure A. Manipulating hives (nucs) to sample for eggs from queens, in the bee yard at Price’s Fork.
Figure B. Sealing of egg (samples) and non-egg vials before setting them in the incubators for temperature treatments at 28°C, 31°C, 34°C or 36°C.
Figure C. Analyzing the samples of gas taken from the vials after temperature treatment for a pre-determined duration.
